9 MW 2017 Used Caterpillar CG260-16 Natural Gas Generator Sets

9 MW 2017 Used Caterpillar CG260-16 Natural Gas Generator Sets

Description

These natural gas generator sets are high-efficiency power units designed for continuous and base-load operations. Built on a robust 16-cylinder natural gas engine platform, they provide dependable electrical output with optimized fuel consumption and reduced emissions. Well-suited for industrial plants, utilities, and large-scale facilities, these sets combine advanced technology with proven durability to deliver reliable performance.

Each unit is engineered for long service intervals and ease of maintenance, minimizing downtime and operating costs. With their ability to run efficiently on pipeline natural gas, they offer a cost-effective and environmentally friendly solution compared to traditional diesel generators.

KEY FEATURES:

- Rated output: 9 MW
- High electrical efficiency with low emissions profile
- Designed for continuous duty and base-load operation

ADVANTAGES

- Lower fuel costs and reduced environmental impact compared to diesel
- Robust design capable of operating under heavy load conditions
- Flexible applications in industrial, utility, and power plant environments

Manufacturer	Caterpillar
Model	CG
Year	CG260-16
Condition	Used
Location	Asia
Qty Available	2 Units
Category	Natural Gas Generators
Subcategory	1 – 9 MW
Stock Number	USP010399
Wattage	9 MW (4.5 MW each)
Hours	12200; 12400
Frequency	50 Hz
Fuel Type	Natural Gas
Voltage	10500 Volts
Balance of Plant Available? (BOP)	-
