1 MW 2009 Used Jenbacher J320 GS Natural Gas Generator Sets

1 MW 2009 Used Jenbacher J320 GS Natural Gas Generator Sets

Description

This 1 MW natural gas generator set, manufactured in 2009, is a durable and high-efficiency power generation solution built for continuous operation. Designed for both base-load and standby applications, it is well-suited for use in industrial facilities, utilities, commercial buildings, and CHP plants. The system features a turbocharged lean-burn gas engine, paired with a high-performance synchronous alternator and a digital control panel that ensures optimal engine performance, monitoring, and protection. With its robust construction and long maintenance intervals, this generator set delivers consistent output, reduced fuel consumption, and lower emissions compared to traditional diesel units. It can operate in island mode or in parallel with the grid and is also adaptable for use in combined heat and power systems for enhanced energy efficiency.

KEY FEATURES:

- Engine Model: 4-stroke, turbocharged, lean-burn gas engine
- Generator Type: Brushless synchronous alternator with AVR
- Mounting: Skid-mounted for stationary installation

ADVANTAGES:

- Operation Mode: Capable of island, parallel, or dual-mode operation
- **Reliability:** Engineered for high uptime in continuous-duty conditions
- Application: Designed for base-load, grid support, or CHP systems

Manufacturer	Jenbacher
Model	J320 GS
Year	2009
Condition	Used
Location	Africa
Qty Available	2 Units
Category	Natural Gas Generators
Subcategory	1 – 9 MW
Stock Number	USP010563
Wattage	1 MW
Hours	- USING -
Frequency	50 Hz
Fuel Type	Natural Gas
Voltage	400 Volts
Balance of Plant Available? (BOP)
