Harnessing Energy for Life

1.9 MW 2011 New Wartsila 6L26D Diesel Generator Sets

1.9 MW 2011 New Wartsila 6L26D Diesel Generator Sets

Description

This diesel generator set delivers a robust output of 1.9 megawatts per unit. These sets are built for continuous or standby power applications, ideal for industrial facilities, remote operations, and energy projects requiring dependable performance. Operating at 900 RPM and 60 Hz, each unit is configured for 690 V output, making them suitable for integration into medium-voltage power systems.

These generators are new and unused, offering zero operational hours, which ensures optimal longevity and performance from the start.

KEY FEATURES:

- **Power Output:** 1.9 MW per unit
- **Turbocharging:** Equipped with high-efficiency turbochargers for improved power density
- **Exhaust System:** Low-emission design compliant with IMO Tier II standards

ADVANTAGES

- **High Efficiency:** Designed for optimal fuel consumption and power output, reducing operational costs.
- **Scalability:** Multiple units allow for flexible deployment across various project sizes

Manufacturer	Wartsila
Model	6L26D
Year	2011
Condition	New (Unused)
Location	Asia
Qty Available	3 Units
Category	Diesel Generators
Subcategory	1 – 9MW
Stock Number	USP010144
Wattage	1.9 MW
Hours	Zero
Frequency	60 Hz
Fuel Type	Diesel
Voltage	690 Volts
