1.3 MW 2013 Used Cummins QSK60-G5 Natural Gas Generator Sets

1.3 MW 2013 Used Cummins QSK60-G5 Natural Gas Generator Sets

Description

This natural gas generator set is powered by the Cummins QSK60-G5 engine, a high-performance gas engine engineered for reliability, efficiency, and low emissions. The unit is ideal for industrial, commercial, and utility applications requiring continuous, prime, or standby power. It provides stable and consistent electrical output with precise voltage and frequency control, making it suitable for sensitive equipment and critical operations.

Its natural gas fuel operation ensures cleaner combustion, lower emissions, and cost-effective running compared to diesel alternatives. The unit can be configured for skid-mounted or containerised installations, offering flexibility for site layout and rapid deployment.

KEY FEATURES:

- Rated output: 1.3 MW
- Brushless, self-excited alternator for reliable power generation
- Skid-mounted or containerised configuration for flexible installation

ADVANTAGES

- High efficiency reduces fuel consumption and operational costs
- Low emissions and environmentally friendly operation
- Flexible installation options allow deployment in various site conditions

Manufacturer	Cummins
Model	QSK60-G5
Year	2013
Condition	Used
Location	Asia
Qty Available	30 Units
Category	Natural Gas Generators
Subcategory	1 – 9 MW
Stock Number	USP010645
Wattage	1.3 MW
Hours	600
Frequency	50/60 Hz
Fuel Type	Natural Gas
Voltage	400 Volts
Balance of Plant Available? (BOP)	-
