1.9 MW 2019 Used Perkins 4006- 23 TAG3A Diesel Power Plant Generator Sets

1.9 MW 2019 Used Perkins 4006-23 TAG3A Diesel Power Plant Generator Sets

Description

These diesel generator sets offer reliable and efficient power generation for industrial, utility, and standby applications. Manufactured in 2019, the units are equipped with Perkins' well-established 4000 Series engines, designed for heavy-duty performance, low emissions, and high fuel efficiency. Each set delivers dependable output and smooth operation, making them suitable for continuous or emergency power in demanding environments.

KEY FEATURES:

- Rated output: 1.9 MW per set
- Operating speed: 1500 rpm
- Configuration: Skid-mounted, power plant-ready units

ADVANTAGES

- Excellent fuel economy and reduced operating costs
- Low emission design compliant with modern environmental standards
- Compact and robust construction suitable for power plant integration
