## 24.5 MW 2014 New Siemens SST-400 Steam Turbine Generator Package

# 24.5 MW 2014 New Siemens SST-400 Steam Turbine Generator Package

## Description

This steam turbine generator package is a high-efficiency, single-casing, axial exhaust condensing unit designed for industrial and utility-scale power generation. The Siemens SST-400 is engineered for continuous-duty operation using saturated or superheated steam and is widely applied in combined heat and power (CHP) systems, biomass plants, refineries, paper mills, and waste-to-energy facilities.

### KEY FEATURES:

- **Turbine Type:** Single-casing, condensing steam turbine with axial exhaust
- **Application:** Suitable for steam turbine generator plants, CHP, biomass, and waste heat recovery systems

### ADVANTAGES:

- **Compact & Modular:** Axial exhaust allows for space-saving installation
- **High Efficiency:** Optimized for high-performance steam cycle operation

Manufacturer	Siemens
Model	SST-400
Year	2014
Condition	New
Location	Europe
Qty Available	1 Unit
Category	Natural Gas Turbines
Subcategory	10 – 99 MW
Stock Number	USP010699
Wattage	24.5 MW
Hours	Zero
Frequency	50 Hz
Fuel Type	Steam
Voltage	11000
Balance of Plant Available? (BOP)	-
