1.5 MW New Cummins KTA50GS8 Diesel Generator Sets

1.5 MW New Cummins KTA50GS8 Diesel Generator Sets

Description

These diesel generator sets are high-capacity, industrial-grade power solutions engineered for continuous or standby applications in demanding environments. These units deliver a dependable 1.5 MW electrical output with excellent fuel efficiency and robust performance. They are equipped with a heavy-duty brushless alternator featuring automatic voltage regulation for stable power supply, along with an advanced digital control panel for real-time monitoring, fault protection, and operational management. The high-capacity cooling system ensures reliable operation in a wide range of ambient conditions, while the rugged construction and globally available parts support make them ideal for long-term, intensive service in industrial, commercial, and utility settings.

KEY FEATURES:

- **Prime Power Output:** 1.5 MW (1500 kW) continuous duty capacity.
- **Fuel Type:** Diesel, with optimized fuel injection for high efficiency and low emissions.
- **Emissions Compliance:** Meets applicable environmental and emission standards.

ADVANTAGES:

- **Fuel Efficiency:** Optimized fuel injection reduces consumption and operating costs.
- **Versatile Operation:** Suitable for continuous, prime, or standby power needs.
- **All-Climate Reliability:** High-capacity cooling system supports performance in varying environmental conditions.

Manufacturer	Cummins
Model	KTA50GS8
Year	-
Condition	New
Location	Asia
Qty Available	2 Units
Category	Diesel Generators
Subcategory	1 – 9 MW
Stock Number	USP010158
Wattage	1.5 MW
Hours	Zero
Frequency	50 Hz
Fuel Type	Diesel
Voltage	380 Volts
Balance of Plant Available? (BOP)	-
