Harnessing Energy for Life

2 MW 2007 Used Cummins QSK60-G8 Diesel Generator Sets

2 MW 2007 Used Cummins QSK60-G8 Diesel Generator Sets

Description

This diesel generator set is powered by the Cummins QSK60-G8 engine, a high-performance, heavy-duty power unit designed for continuous and standby power generation. The unit delivers reliable, fuel-efficient, and stable performance, making it suitable for industrial plants, commercial facilities, and backup power applications. Its rugged design ensures dependable operation under tough site conditions, while its advanced control system allows precise monitoring and protection of engine and generator functions.

Built for durability and ease of maintenance, the QSK60-G8 generator set is engineered to provide consistent power output and extended service life. The unit's robust cooling and alternator systems maintain efficient operation even in high ambient temperatures, ensuring continuous performance and minimal downtime.

KEY FEATURES:

- Rated output: 2 MW
- Radiator-cooled system for effective thermal management
- Skid-mounted or containerised design options available
- Suitable for continuous, prime, or standby operation

ADVANTAGES

- Excellent fuel efficiency and low operational cost
- Rugged construction for operation in demanding environments
- Flexible configuration for integration into a wide range of industrial and utility applications

Manufacturer	Cummins
Model	QSK60-G8
Year	2007
Condition	Used
Location	Asia
Qty Available	3 Units
Category	Diesel Generators
Subcategory	1 - 9 MW
Stock Number	USP010719
Wattage	2 MW
Hours	450
Frequency	50 Hz
Fuel Type	Diesel
Voltage	400
Balance of Plant Available? (BOP)
