# 17.6 MW 2006 Used Caterpillar C280-16 Diesel Power Plant Generator Set

## Description

This diesel power plant generator set, manufactured in 2006, is a heavy-duty unit designed for continuous and reliable power generation. Known for its robust performance, durability, and high efficiency, this set is well-suited for both base-load and standby applications. Its proven track record in large-scale industrial and utility power generation makes it a dependable choice for operators requiring consistent output and reliability.

### KEY FEATURES:

- **Prime Power Output:** 17.6 MW continuous rating
- **Fuel System:** Advanced fuel injection system for improved efficiency and reduced emissions
- **Application:** Designed for heavy-duty industrial and power plant operations

### ADVANTAGES:

- **High Efficiency:** Optimized combustion and turbocharging deliver maximum fuel-to-power conversion.
- **Robust Design:** Built for continuous base-load duty with strong resistance to wear under high-load operations.
- **Scalability:** Suitable for integration into larger multi-unit power plant configurations.
