2.5 MW 2004 Used Hyundai Himsen 9H25/33 Diesel Generator Set

2.5 MW 2004 Used Hyundai Himsen 9H25/33 Diesel Generator Set

Description

This diesel generator set is a robust, medium-speed power unit designed for reliable operation in industrial and power plant applications. The unit is equipped with a 9-cylinder, four-stroke engine coupled to a high-voltage alternator, offering dependable continuous or standby power. Built with a bore and stroke of 250 mm × 330 mm, the Himsen 9H25/33 is engineered for efficiency, durability, and ease of maintenance. Its sturdy construction and proven performance make it suitable for base load operation in demanding environments.

KEY FEATURES:

- Rated output of approximately 2.5 MW
- **Emissions compliance:** designed to meet IMO Tier II / Tier III with optional aftertreatment
- **Cooling system:** water-cooled with integrated heat exchanger
- **Fuel consumption:** approximately 180 g/kWh at full load

ADVANTAGES

- **High efficiency:** optimized combustion design ensures low specific fuel consumption.
- **Durable design:** robust engine components and medium-speed operation extend service life and reduce wear.
- **Operational flexibility:** stable performance under varying load conditions.

Manufacturer	Hyundai Himsen
Model	9H25/33
Year	2004
Condition	Used
Location	Asia
Qty Available	4 Units
Category	Diesel Generators
Subcategory	1 – 9 MW
Stock Number	USP010613
Wattage	2.5 MW
Hours	14000
Frequency	50 Hz
Fuel Type	Diesel
Voltage	11000 Volts
Balance of Plant Available? (BOP)	-
