1.5 MW 2019 Used Jenbacher JGS-420 Natural Gas Generator Sets

1.5 MW 2019 Used Jenbacher JGS-420 Natural Gas Generator Sets

Description

These natural gas generator sets are high-efficiency, medium-capacity gas-fired power generation units designed for continuous or standby applications in industrial, commercial, and utility environments. The generator sets feature the proven JGS-420 gas engine, optimized for high electrical efficiency, low emissions, and long service intervals. Operating on natural gas, they provide a cleaner and more cost-effective alternative to diesel generation, making them ideal for cogeneration (CHP) systems where both electricity and heat can be utilized. These units come with a strong operational history and are built for reliable, long-term performance with minimal downtime.

KEY FEATURES:

- 1.5 MW electrical output per unit
- High electrical efficiency with low specific fuel consumption
- Low-emission design meeting stringent environmental standards

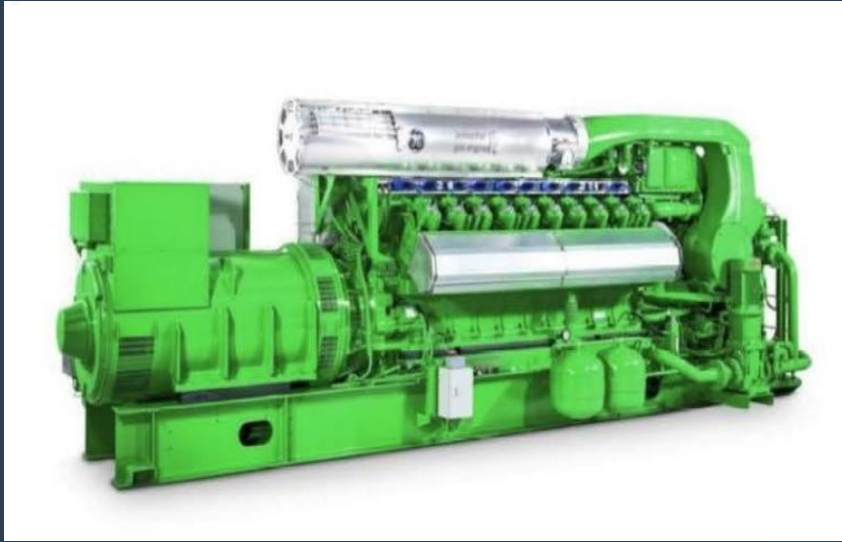

ADVANTAGES:

- Versatile application in industrial, commercial, or utility sectors
- Lower environmental impact with reduced CO₂ and NO_x emissions
- Long service intervals and low maintenance requirements

Manufacturer	Jenbacher
Model	JGS-420 GS-NL
Year	2019
Condition	Used
Location	Australia
Qty Available	5 Units
Category	Natural Gas Generators
Subcategory	1 – 9 MW
Stock Number	USP010829
Wattage	1.5 MW
Hours	27000; 28000; 28000; 29000; 28000
Frequency	50 Hz
Fuel Type	Natural Gas
Voltage	3300 Volts
Balance of Plant Available? (BOP)	-
