1 MW 2006 Used Cummins QST30-G4 Diesel Generator Set

1 MW 2006 Used Cummins QST30-G4 Diesel Generator Set

Description

This diesel generator set is a heavy-duty power unit designed to provide reliable performance in both continuous and standby duty operations. It delivers consistent electrical output while maintaining strong fuel efficiency and durability. The unit is well-suited for industrial plants, utilities, and large-scale facilities requiring dependable diesel power.

With emissions designed to comply with international standards in its class, the generator provides a balance of performance and environmental responsibility. Its design incorporates advanced combustion technology to optimize fuel efficiency while keeping emissions within regulated limits. Ease of maintenance, combined with a global service and spare parts network, ensures reduced downtime and long-term reliability

KEY FEATURES:

- Rated output: 1 MW
- Designed for continuous, standby, and prime duty applications
- Emission compliance in line with industry standards

ADVANTAGES

- Efficient fuel consumption lowers operating costs
- Stable power supply suitable for sensitive and critical loads
- Reduced environmental impact with regulated emissions performance

Manufacturer	Cummins
Model	QST30-G4
Year	2006
Condition	Used
Location	Europe
Qty Available	1 Unit
Category	Diesel Generators
Subcategory	1 – 9 MW
Stock Number	USP010867
Wattage	1 MW
Hours	7000
Frequency	50 Hz
Fuel Type	Diesel
Voltage	415 Volts
Balance of Plant Available? (BOP)	-
