

High Speed Seed-Bag Machine

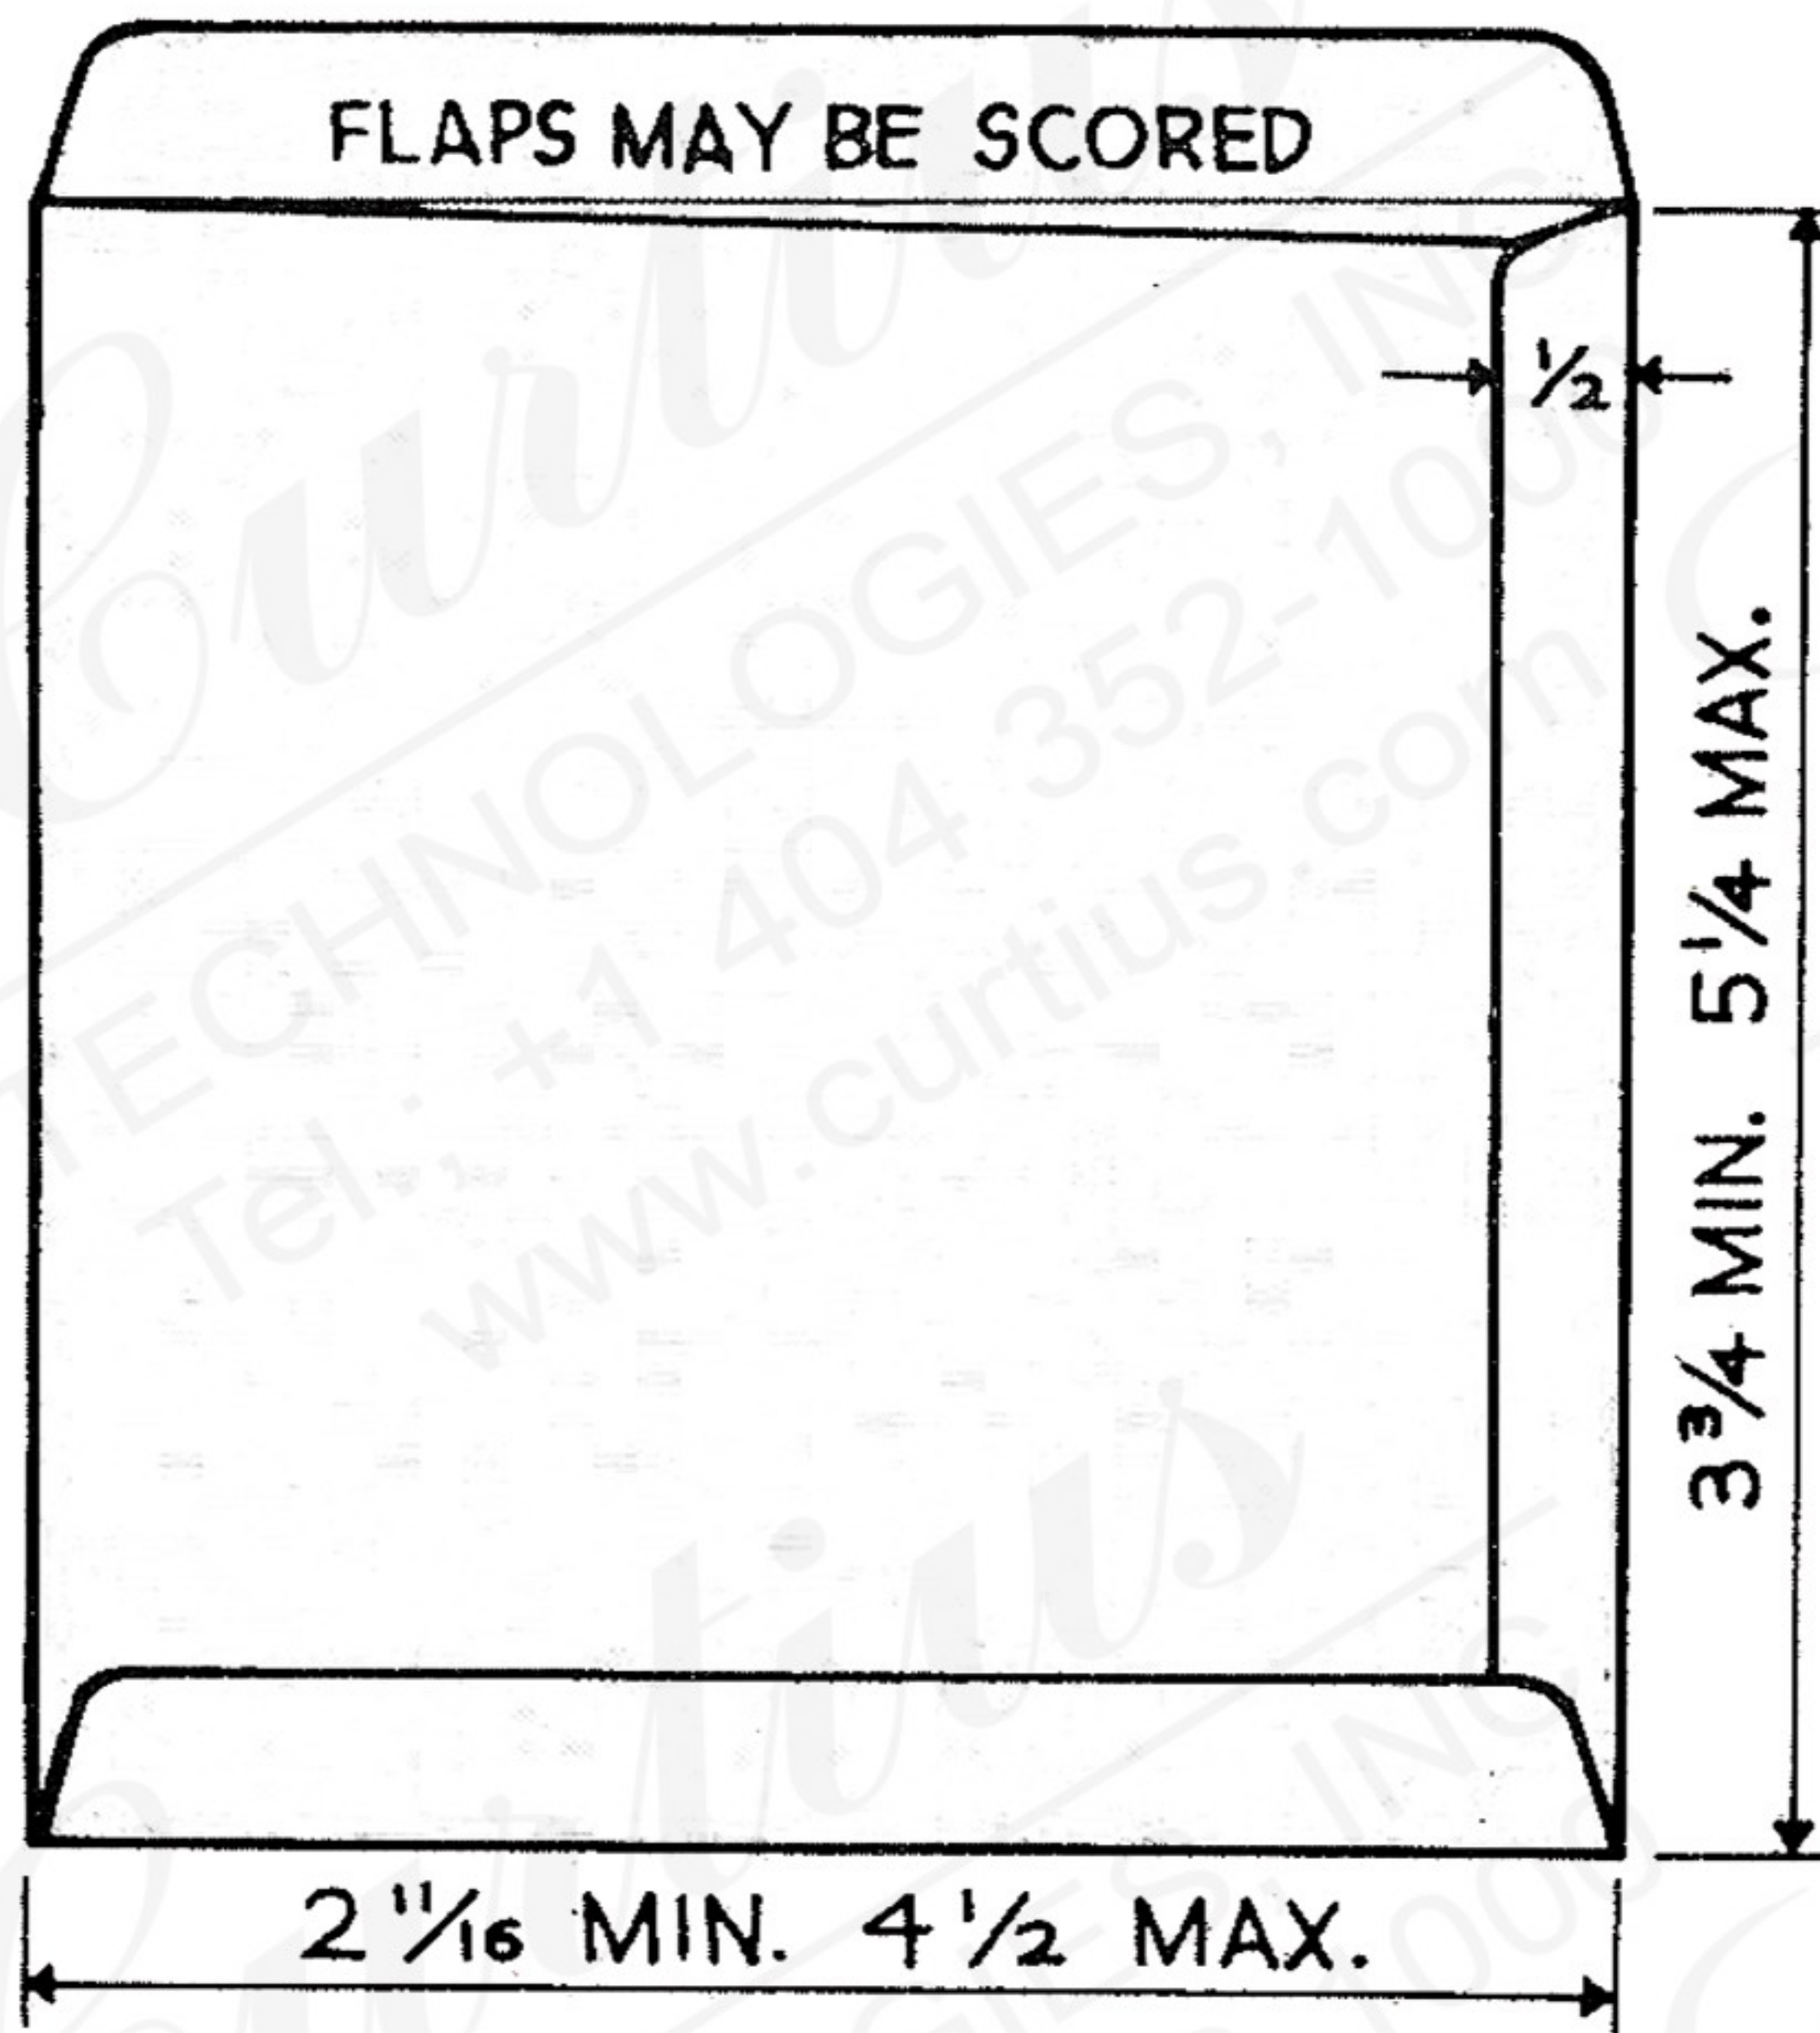

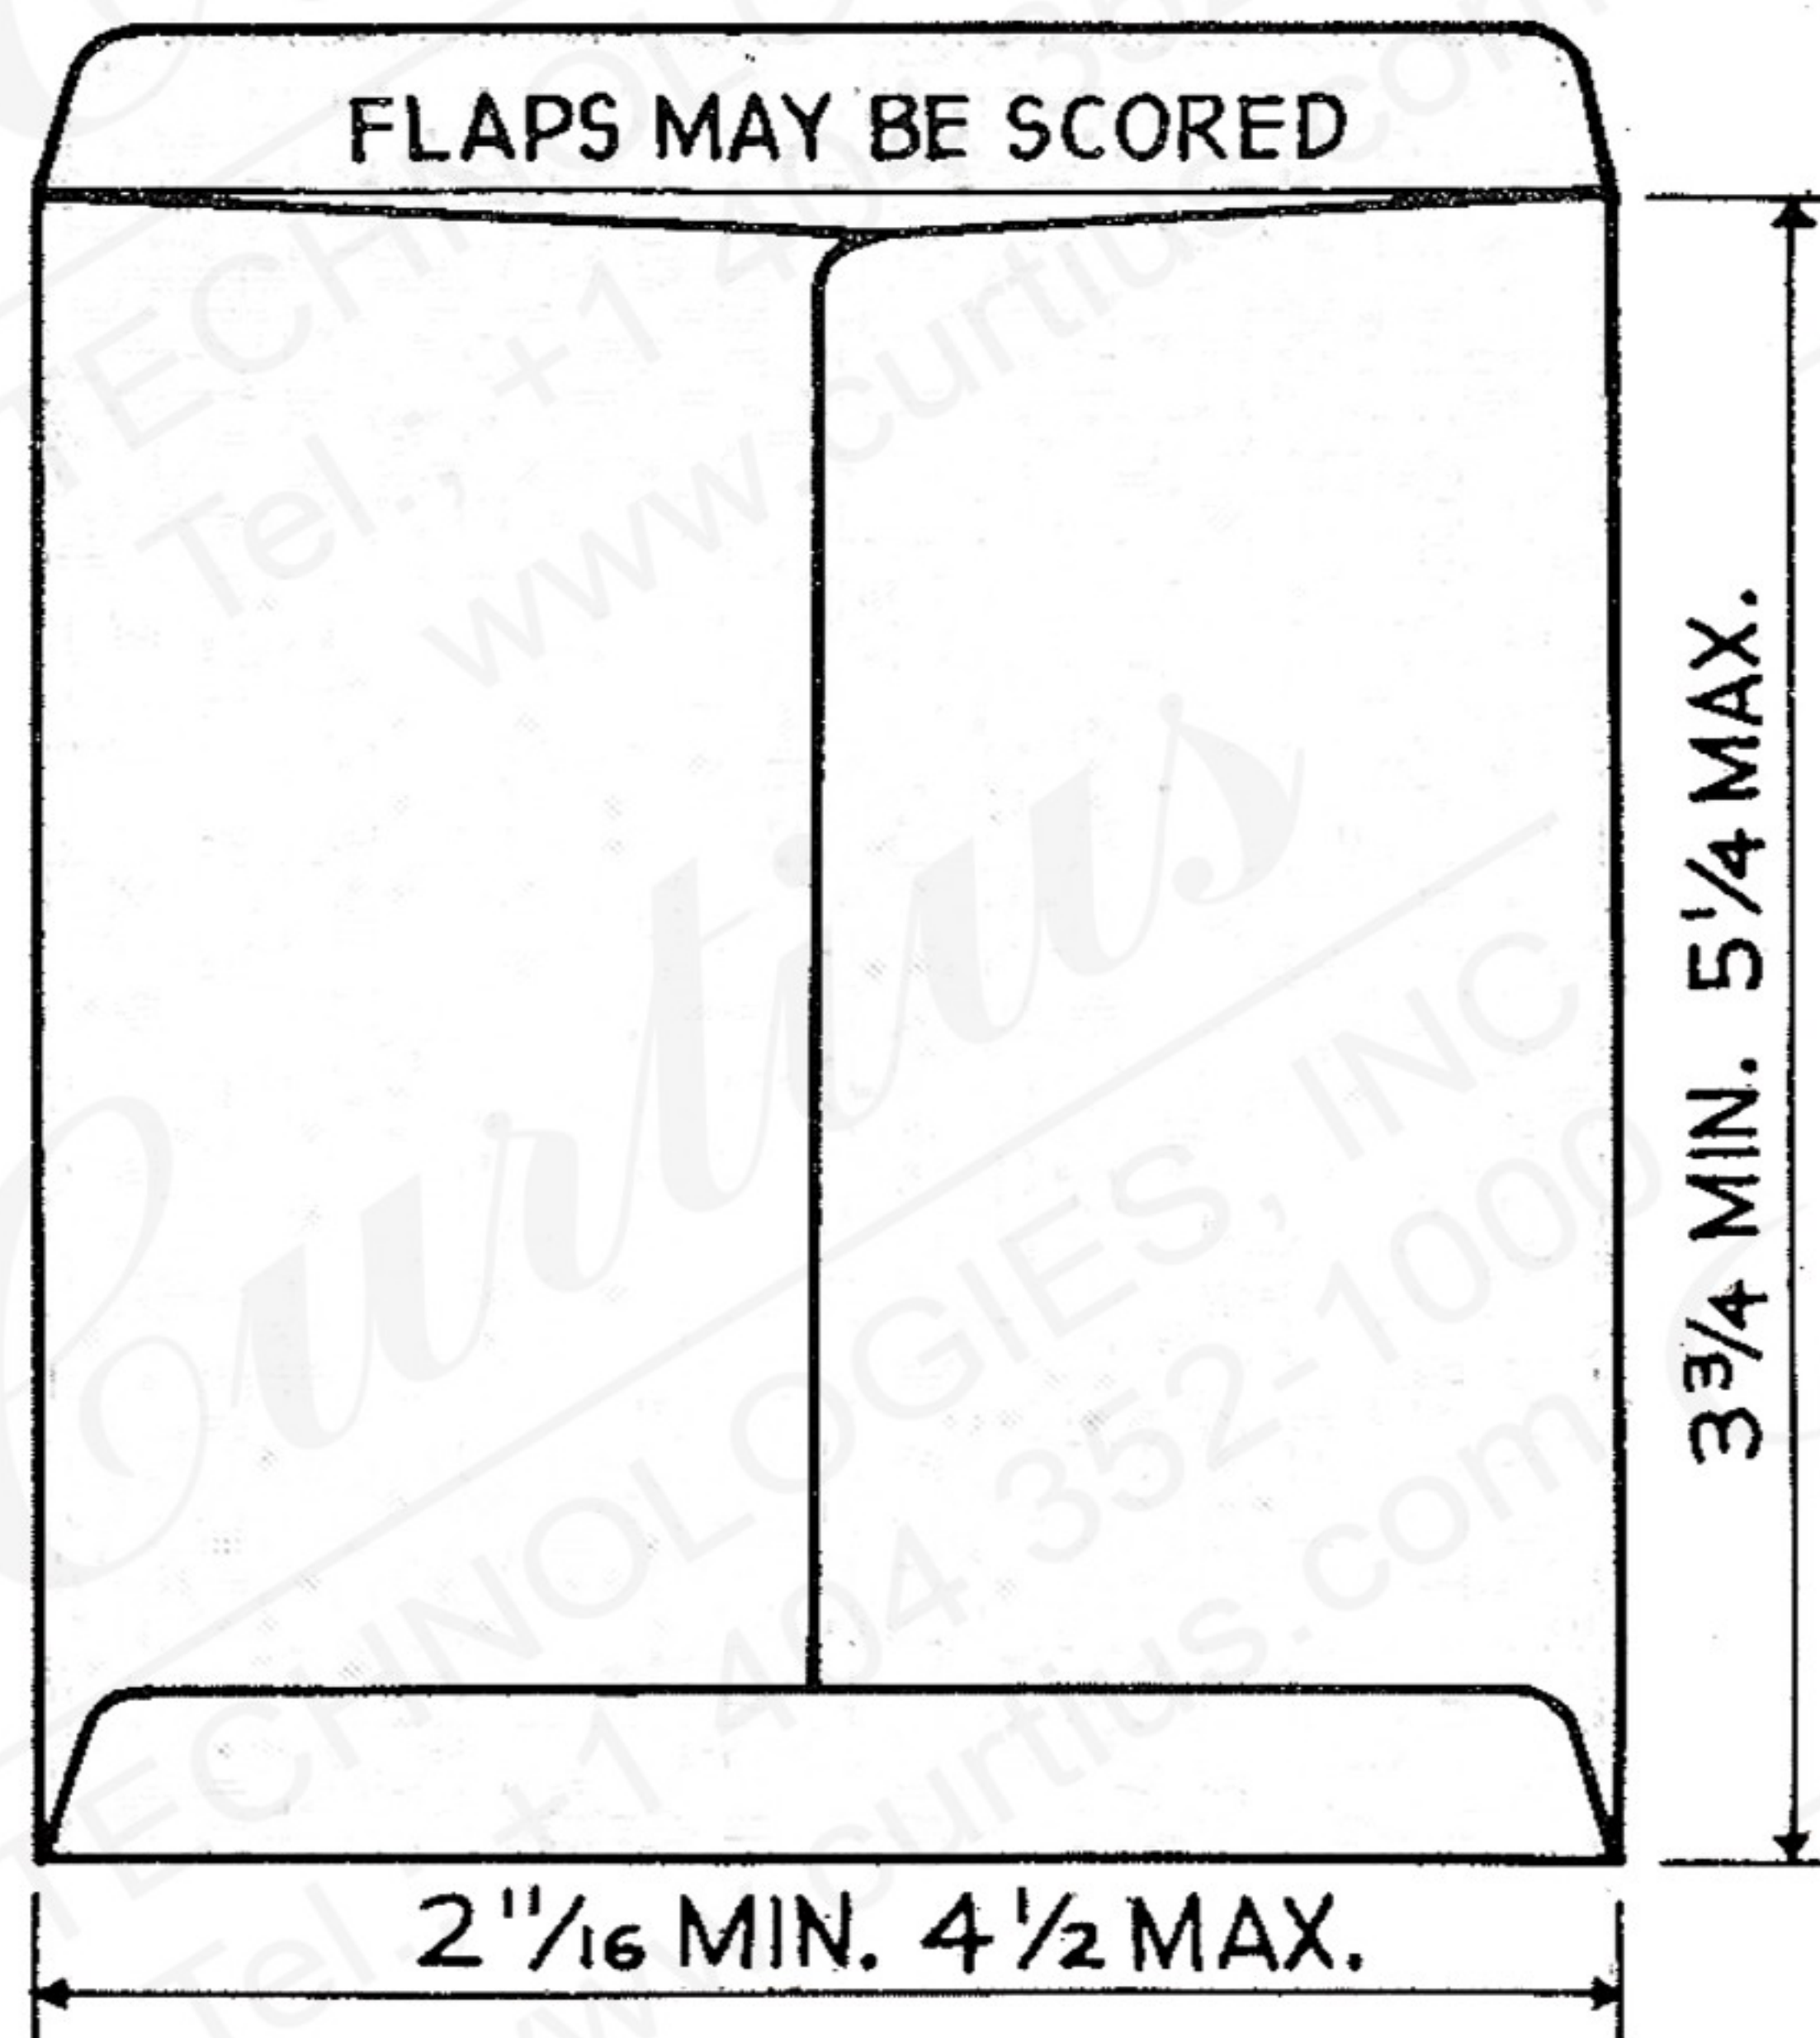

F. L. Smithe **XB**

High Speed Seed-Bag Machine

F. L. Smithe **XB**

The **Champion High Speed Seed-Bag Machine XB** is a specialty machine developed for very high production on seed-bag types of envelopes. It utilizes the SO principle in general, but on a "double feed" basis; there are twice the number of pins in the aligner and twice the number of grippers on the cylinder. The range of this machine is 2 11/16" x 3 3/4" to 4 1/2" x 5 1/4". The seal flap is not gummed or folded on this machine and the finished envelopes are delivered at the feeder end of the machine. Thus the operator can feed the blanks and pick up the finished product from the same spot.

The XB Machine produces up to 650 envelopes per minute. It is generally used for seed-bag type envelopes but will also make center seam envelopes within the range of the machine. The XB utilizes extra heavy construction for higher speeds and its folding quality matches that of the SO Machine.

ENVELOPE RANGE	CAPACITY Env. per minute	FLOOR SPACE	HEIGHT	POWER (DRIVE)	SHIPPING WEIGHT		SHIPPING DIMENSIONS
					GROSS	NET	
2 11/16 x 3 3/4 TO 4 1/2 x 5 1/4	UP TO 650	4'0" x 14'6"	4'1"	3 HP	4435 LBS.	4100 LBS.	120"L. x 43"W. x 50"H.

NOTE: This machine has an auxiliary motor requiring an additional 1/2 H.P.

Capacity, weights and dimensions approximate.
