

Transducer Options

- Compatible with many AIRMAR transducers
- Single channel Broadband/CHIRP (Choose Low, Med or High)
- Selectable Frequency option (28kHz-250kHz)
- Traditional Dual Frequency (50/200)
- Expansion options within Simrad network
 - E.g. - compatible display/controller for BSM-3 dual CHIRP sonar module
 - Dual CHIRP transducers require connection to BSM-3 for operation
