WIRED
WIRELESS

ANT

WiFi

KEY FEATURES

3 YEAR
WARRANTY

HIGH QUALITY AUDIO THROUGH DSP

The power of Fusion's Digital Signal Processing (DSP) enables the optimization of Fusion speakers in each audio zone on your vessel. Our system approach ensures every step of the audio chain is optimized through calculations by our engineers to deliver a technically superior listening experience – without the need for you to have a technical understanding. From the kick drum to your eardrum Fusion DSP reproduces your music the way the musicians intended.

TOUCHSCREEN DISPLAY

Control your entertainment with the touch of a finger on the optically bonded touchscreen display. Simply tap the screen to pause and play, or swipe through your playlist to your favorite song – the future has arrived.

WORLD'S FIRST MARINE WI-FI STEREO

Wi-Fi audio streaming delivers higher quality audio through Wi-Fi's exceptionally faster data transfer rate in comparison with Bluetooth. PartyBus over Wi-Fi allows for quick and simple network setup.

OVER-THE-AIR SOFTWARE UPDATES

Over-the-air software updates are now available from your smartphone or compatible device via the free Fusion-Link™ app, making the Apollo Series intelligently simple and always up to date.

FUSION-PARTYBUS

The power of PartyBus kicks in when you add more PartyBus enabled stereos to your entertainment system. Each additional PartyBus enabled stereo gives you the option to join Party Mode and play the same perfectly synced audio source through the entire vessel. Switch into Personal Mode and listen to available audio sources from your stereo in the area of your choice without disrupting Party Mode in the other areas of the vessel.

FUSION-LINK™ CONTROL

The Fusion-Link remote control app gives you the flexibility to control your onboard entertainment from anywhere on the boat, with multiple connectivity options available:

- NMEA 2000 network via a partnered Multi-Function Display.
- Ethernet via a partnered Multi-Function Display.
- Wi-Fi via a wireless Ethernet router or wireless network.
- NRX Series remote via a stand-alone Fusion Remote Control Network.
- Bluetooth Wireless Technology via a compatible Apple or Android device.
- ANT via a compatible Garmin watch with the Fusion-Link Lite app.

TRUE-MARINE PHILOSOPHY

Fusion's True-Marine design philosophy stems from our experience confronting the harsh marine environment. By designing and engineering from the ground up specifically for real world boating applications, our customers are assured that the equipment they fit into their vessel will deliver quality entertainment season after season.
