RAPTOR MOUNTING BRACKETS

Raptor's single-piece aluminum brackets provide superior strength and a rock-solid hold on the back of your boat. They're powder-coated for corrosion resistance in any situation, and mounted with stainless steel hardware. Just choose how you want to mount Raptor and we've got the perfect bracket for you.

EXTENSION OR ANGLE BRACKET

Need a custom fit? Our full selection of brackets allows you to add offset or change your angle of deployment to fit your fishing needs. For use in direct or jack plate mount applications

JACK PLATE BRACKET

Jack plate brackets mount directly to your jack plate on the port or starboard side of your boat providing a rock solid mounting surface for your Raptor Shallow Water Anchors.

SANDWICH BRACKET

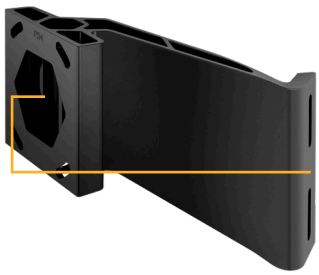

Our universal sandwich brackets mount between your jack plate and transom or between your transom and outboard, for use with our jack plate adapter bracket in port or starboard Raptor mounting applications.

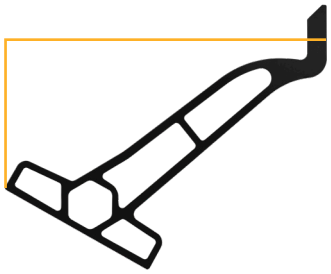

CHOOSE YOUR BRACKET

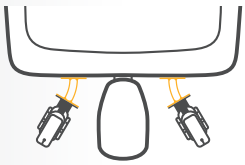

Our jack plate brackets come in configurations to fit most rigging applications. Just select port or starboard, setback, rise and color.

Rise

Setback

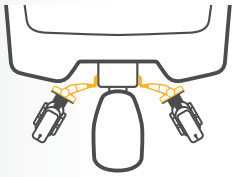

Direct to Transom Mounting

Direct Mount Angle Bracket

If you're mounting directly to your transom, this bracket delivers maximum holding power and an optimal deployment angle for Raptor.

Jack Plate Mounting

Jack Plate Brackets

If you're mounting to your outboard's jack plate, choose whether you're mounting on the port or starboard side. For smaller, lighter boats choose the 4" rise. For larger, heavier boats choose the taller 6" rise. You can also use these brackets without a jack plate by adding the Raptor Universal Sandwich Adaptor.

5 YEAR WARRANTY

All Raptor shallow water anchors and brackets are built saltwater tough and backed by a manufacturer 5-yr warranty.
