## Design & Function

The Linea has been designed for jobs that just can't wait. As well as being able to cope with long, continuous runs, it is highly versatile and ideal for laminating different size media such as long banners or odd shaped pieces.

## Style

The Linea is adaptable and can be used as a desktop or free standing system (The DH-360 is desktop only). The range has been carefully designed with well thought-out features making it easy to use and highly efficient.

## Quality & Simplicity

Unlike other models on the market, the Linea has an all metal construction and heavy duty motors so it is built to last. It is a leading system when reliability is imperative.

### IDEAL FOR LAMINATING

- signage & posters
- large photographic prints
- lengthy banners
- maps
- odd sized media

and many more...

### GREAT FOR USE IN

- reprographic departments
- copy shops
- print shops
- education - schools, colleges and universities

# LINEA series

## LINEA DH-360 / DH-460 / DH-650 / DH-1100

### LINEA DH-360

- laminates documents up to A3
- continuous roll fed system
- hot encapsulation / lamination
- adjustable temperature control
- adjustable speed control
- anti-jam reverse mode
- attached safety shield

A3

### LINEA DH-460

- laminates documents up to A2
- continuous roll fed system
- hot encapsulation / lamination
- adjustable temperature control
- adjustable speed control
- anti-jam reverse mode
- attached safety shield

A2

### LINEA DH-650

- laminates documents up to A1
- continuous roll fed system
- hot encapsulation / lamination
- adjustable temperature control
- adjustable speed control
- anti-jam reverse mode
- attached safety shield
- optional stand available

A1

### LINEA DH-1100

- laminates documents up to 1100mm
- continuous roll fed system
- release liner take-up
- hot encapsulation / lamination & mounting (up to 5mm)
- adjustable temperature control
- adjustable speed control
- anti-jam reverse mode
- attached safety shield
- complete with stand
