

A close-up photograph of an electric pipe bender. The device consists of several cylindrical rollers that guide a pipe. The pipe being bent is glowing with a bright red-orange light, indicating it is being heated. The rollers are dark and appear to be made of metal. The background is a solid blue color. A semi-transparent blue horizontal bar is overlaid across the middle of the image, containing the text "Electric pipe bender".

Electric pipe bender kit

A handy, easy-to-use, portable, and electric tool. It's suitable for precise bending of galvanized steel, stainless steel, and copper pipes in electrical, pneumatic, and hydraulic installations.

Supplied with ADJUSTMENT of the bending angle and automatic stop which allow repetitive operations, simplifying and speeding up the work. The kit is supplied with bending dies for the different pipe diameters (16-20-25 mm) and a case.

On request, dies and counter-dies up to \varnothing 35 mm can be supplied.

Characteristics

Power	1010W
Weight	13 kg
Power	230V 50/60Hz
Bending capacity	tube \varnothing 16-35 mm
Bend Angles	0°-180°
Dimensions	590x145x215 mm
