

Horizontal Closed Door Hinge-Side™ Baler Series

Patented Productivity **Featuring a 54" wide charge box opening**

Exclusive Design.

Never before could you get a horizontal baler with the popular sized 29" wide, by 43" high, by 60" long bale...and also have a huge charge box opening.

Increased Productivity.

Now you can feed large bulky corrugated, news, and most high grade materials without pre-conditioning. And you will also get much higher through-put with the IPS patented Hinged Sidewall Baler because the articulating sidewall also pre-compresses the material, which means it will typically take less strokes to complete a bale.

Experienced Manufacturers.

Let us help you solve your recycling problems. Our management team has over 150 years of combined experience in the design and manufacture of balers. Call today to learn more about the complete line of Hinge-Side™ Balers from IPS.

Innovative Ideas.

The exclusive IPS articulating sidewall expands the charge box width opening, pre-compresses the material and dramatically improves production.

Bale Weight Misc. ALUMINUM	N/A	N/A	N/A	Up to 1900 LB 864 KG

Standard Features:

- Bales High-Grade Paper Without Fluffing
- Large Charge Box Opening
- Export Bale Size and Density
- Pre-Compression Virtually Eliminates Shearing
- Allen-Bradley Logic Controller

Available Options:

- Oil Cooler
- Conveyor Controls
- Feed Hopper Extensions
- Oil Heater
- Baling Wire

As part of our continuing product improvement and quality assurance programs, specifications are subject to change without notice and without incurring responsibility for units previously sold.
