

340 Wire Tier

20 years of proven dependability.

- Adaptable to 2-ram balers.
- Assembled on EZ mount frame for ease of application (with debris guards).
- Tilt-back head for ease of field maintenance.
- 360° wire feed provides total layout flexibility.
- Track system made of top-quality, heat-treated steel, which helps prevent rust and keeps track clean.
- Triple-grooved pinch wheels for extended wear life.
- 8-sided wire-cutter insert for extended use.
- Proximity switches to reduce wear and increase reliability.
- ANSI B-11-compliant safety interlocks.
- High-efficiency 4-twist knot produces the highest knot strength in the industry.
- Uses the widest range of galvanized wire (10-13 ga.) of any tier on the market.
- Designed to employ Super Hi-Ten and Premium galvanized wire.
- Speeds – Typical cycle time is approximately 5 seconds, potentially producing up to 720 straps per hour.
