Kingsland 70 XS Universal Steelworker

Selection of Punches and Dies

The Kingsland 70 XS Universal Steelworker is a type of machine used for metalworking. It is designed to perform a variety of operations such as punching, notching, shearing, and bending on different types of metal sheets, plates, and profiles. The machine is named "universal" because it can be used for a wide range of applications in various industries such as construction, engineering, and manufacturing.

The Kingsland 70 XS Universal Steelworker is capable of producing up to 70 tons of punching force and can handle a maximum sheet size of 500mm x 18mm. It is equipped with a variety of punching tools and dies, as well as other cutting and bending tools, making it a versatile machine for different applications. The machine can be operated manually or automatically and is designed for high productivity, accuracy, and safety.

Overall, the Kingsland 70 XS Universal Steelworker is a powerful and reliable machine that is widely used in the metalworking industry for its versatility, efficiency, and precision.
