Jones & Shipman 540P Surface Grinder

C/W Eclipse Magnetic Chuck

Sony Two Axis Digital Readout

Dust Extractor

The Jones & Shipman 540P Surface Grinder is a machine used for precision surface grinding of metal components. It is a high-precision machine that is capable of achieving tight tolerances and excellent surface finishes on flat surfaces.

The machine is designed with a grinding wheel that is driven by a motor, which rotates at high speeds to remove material from the surface of the workpiece. The grinding wheel is mounted on a precision spindle, which is guided by linear bearings to ensure accuracy and repeatability.

The Jones & Shipman 540P Surface Grinder also features a user-friendly control panel that allows operators to adjust various grinding parameters, including grinding wheel speed, feed rate, and depth of cut. The machine also has a coolant system that helps to keep the grinding wheel and workpiece cool during the grinding process, which helps to prevent thermal damage and improve surface finish.

Overall, the Jones & Shipman 540P Surface Grinder is a high-quality machine that is suitable for a wide range of metalworking applications, including the production of precision components for aerospace, medical, and automotive industries.
