III ESSEX PLANT III

& MACHINERY

The Colchester Bantam 2000 Lathe is a machine used for turning and shaping metal and other materials. It is designed with a horizontal spindle that holds the workpiece, which is rotated at high speeds to cut and shape it with precision.

The Colchester Bantam 2000 Lathe is a versatile machine that is suitable for a wide range of turning applications, including facing, turning, drilling, boring, and threading. It is designed with a range of cutting speeds that can be adjusted to suit different materials and applications, as well as a variety of cutting tools that can be used to achieve different shapes and finishes.

The machine is also equipped with a range of features that improve its accuracy and ease of use, including a quick-change tool post that allows operators to change cutting tools quickly and easily.

Overall, the Colchester Bantam 2000 Lathe is a reliable and efficient machine that is ideal for use in metalworking workshops, fabrication facilities, and other industrial settings. It is capable of delivering accurate and consistent results, making it an essential tool for many manufacturing processes.
