Startrite EF1P Geared Head Pillar Drill

Variable Speed Down Feed

Speeds: 80 - 2800Rpm

Rise & Fall Tilting Table (360mm x 300mm)

Spindle (3 Morse) Travel: 170mm

Throat: 312mm

The Startrite EF1P geared head pillar drill is a powerful and precise machine used for drilling holes in a variety of materials, including metal, wood, and plastic.

The machine features a robust construction, including a heavy-duty cast iron base and a geared head for increased torque and accuracy. The geared head also allows for a range of drilling speeds, which can be adjusted easily using the machine's belt and pulley system.

The Startrite EF1P drill also features a depth stop mechanism, which ensures consistent drilling depth for repetitive tasks. The table can be adjusted both vertically and horizontally to accommodate different workpiece sizes and angles.

Other features of the Startrite EF1P drill include a chuck guard for operator safety, a coolant system to reduce friction and prolong tool life, and a range of customizable options such as different-sized chucks and drill bits.

Overall, the Startrite EF1P geared head pillar drill is a reliable and precise machine suitable for a wide range of drilling applications in small to medium workshops, factories, and maintenance operations. Its robust construction, adjustable drilling speeds, and depth stop mechanism make it a popular choice for both novice and experienced operators.
