stroke rod and magnetic slip gauges

The Keetona Hydroform 2500mm x 3mm hydraulic folder is a powerful and versatile machine used in metalworking applications to create precise folds and bends in sheet metal and other materials. It features a hydraulic clamping system that securely holds the material in place during folding, as well as a range of customizable options to suit different materials and thicknesses.

The Hydroform 2500mm x 3mm is designed for ease of use and precision, with a user-friendly interface that allows operators to quickly and easily adjust settings and perform folding operations. Its compact design and durable construction make it ideal for use in small to medium-sized workshops or manufacturing facilities.

Other features of the Keetona Hydroform 2500mm x 3mm hydraulic folder include a programmable controller for enhanced precision and efficiency, as well as a range of customizable options, such as different folding angles and back gauge positions. Additionally, the machine is designed to minimize operator fatigue and increase productivity, with a range of safety features to ensure safe and reliable operation.

Overall, the Keetona Hydroform 2500mm x 3mm hydraulic folder is a reliable and efficient tool for creating precise folds and bends in a variety of materials. Its customizable options, ease of use, and durable construction make it a popular choice for metalworking professionals looking to enhance their production capabilities.
