High accuracy peristaltic
filling pump

104 rue de Lisbonne, Parc d'Activités de SERMENAZ
69 140 RILLIEUX LA PAPE - FRANCE

*Filling accuracy up to $\pm 0.5\%$
Filling range: 0.01 to 25ml*

Features:

- Solution can be integrated on any new or existing line
- Centralized mono or multi-head system
- Quick change of head with Klyx® system
- 100% removable head for cleaning
- Materials of construction compliant with isolator use
- Quick head change without tools
- One hand assembly and disassembly capability of the head
- One hand tubing assembly and disassembly capability
- Light weight head
- Possibility of using single-use pre-sterilized tubing
- Pharmaceutical safety and traceability with the version embodying the RFID technology for disposable tubing

With a filling accuracy reaching $\pm 0.5\%$, our Peristaltic Malys[®] filling system aims to optimize filling conditions.

Filling range: 0.01 to 25ml

Features:

- Single or multi-head system
- Quick head change without tools with Klyx[®] system
- 100% cleanable
- Front pannel tight even when removed head
- Compliant with isolator use
- One hand head assembly and disassembly
- One hand tubing assembly and disassembly
- Light weight head
- Use safe
- Possibility of using single-use pre-sterilized tubing
- Ergonomic operator interface (option)
- Unlimited receipes (option)
- Fine filling tuning (option)
- 21 CFR P11 (option)
- Production batch tracking (option)
- Stepper motorized or closed loop brushless (option)
- Pharmaceutical safety and traceability with the version embodying the RFID technology for disposable tubing

Platinum-cured silicon tubing going from 0,5 to 4,7mm ID

Standards:

Ø of the tube	Reference	Volumes	Ø of needle
1. Ø0.5x3.7	T5	0.01-0.4ml	0.6
2. Ø0.8x4	T8	0.4-1ml	1
3. Ø1.2x4.4	T12	1-2ml	1.6
4. Ø1.6x4.8	T16	2-3.4ml	3.2
5. Ø3.2x6.4	T32	3.4-15ml	4.5
6. Ø4.7x7.9	T47	14-25ml	6

Filling kits can be customized, delivered assambled in bags, sterilized or not.

Features:

- No cleaning and sterilization of tubing to be carried out before the production.
- No qualifications for tubing cleaning
- ISO 8 Clean Room Manufacturing
- Secure assembly with 100% control
- Sterilization by gamma irradiation (validation report available)
- Customized connections and dimensions
- Recognition of the dosing format installed on the machine (with option RFID)
- Detection of sterility expiration date (with RFID option)
- Preventing misuse of tube set (with RFID option)
- Ability to trace tubing lot numbers (with RFID option + batch tracking)
- Possibility of RFID-specific labelling, possibility of RFID labelling and programming
