

HP 12 (Heinkel)

Description	hybrid filterpress
Type	HP 12
Category	Filter press / Centrifuges
Manufacturer	Heinkel
Ref-No.	F40341

Technical data

Material	Edelstahl 1.4571/ stainless steel
Year of manufacture	1989
Content	16 ltr
Weight	2000 kg
Length x Width x Height	2500 mm x 1300 mm x 2000 mm
Machine data	Filter area : 0,12 m ² Fill : 16 ltr. Working pressure : 25 bar.

Further information	Basic application area: - Suspensions with subtle and subtlest solid materials, which need for fast and optimal dehumidification a high adrift pressure difference.. - Dry sludge, those won coal is compressible and throught strong mechanical pressure arrives a drastic reduction of pore volume - Products, at those a widely dehumidification is possible after cake constitution through a displacement of pore fluid through gas - Suspensions, whose need for unproblematic abscission a degressive or a progressive supply of dehumidification potential.
