

## CORROSION CRUSHER

**CLASSIFICATION:** Rust and Stain Remover

### DESCRIPTION:

Specialized truck wash engineered to eliminate stubborn micro-nutrient stains. Effectively removes iron, manganese, phosphates, iron oxide (rust), grease, and oils from vehicles and equipment. Fast-acting and safe on all surfaces, it outperforms traditional soap and water. Replacing harsh acid products that can damage equipment without properly removing stains. Delivers powerful, surface-safe cleaning in one efficient application.

### FEATURES & BENEFITS:

- Targeted micro-nutrient and rust removal.
- Surface-safe formula.
- Acid replacement technology.

### PHYSICAL CHARACTERICS:

- Color - Green
- Odor - Odorless
- pH (1%) - 1.0
- Specific Gravity - 1.254

Alkalinity	Chelation	Foam
Acidic	High	High

### PACKAGE SIZES:

- 20L Pail (5 gal.)
- 205L Drum (55 gal.)
- 1000L Tote (265 gal.)

## CORROSION CRUSHER

---

### USE INSTRUCTIONS:

Corrosion Crusher is a concentrate and must be diluted with water to activate special cleaning agents. Depending on type of equipment used, vary dilution and contact time where necessary for greater or lesser cleaning.

For best results use 1 part of Corrosion Crusher to 2 parts of cold water.

Apply solution with brush, sprayer or foamer starting at the bottom and working upwards.  
- Allow to stand two or three minutes, then rinse with cold water.

For difficult to clean surfaces, repeat if needed, allowing Corrosion Crusher to remain a little longer before flushing with water.

It is recommended to consult your sales representative for assistance in setting up your chemical product.
