

## CRYSTAL FINISH

**CLASSIFICATION:** Non-Etching Aluminum Brightener

---

### DESCRIPTION:

Highly concentrated professional grade cleaner that keeps trucks and aluminum parts like new. It works quickly, easily and completely. This product is an alternative to traditional hydrofluoric acid based aluminum cleaners. When diluted with cold water, it delivers outstanding results in metal restoration.

---

### FEATURES & BENEFITS:

- Safer than traditional HF based aluminum brighteners.
  - Easy to dilute and use.
  - Brush and spray compatible.
- 

### PHYSICAL CHARACTERISTICS:

- Color - Green
- Odor - Odorless
- pH (1%) - <1.0
- Specific Gravity - 1.02

Alkalinity	Chelation	Foam
Acidic	High	Low

---

### PACKAGE SIZES:

- 20L Pail (5 gal.)
  - 205L Drum (55 gal.)
  - 1000L Tote (265 gal.)
-

## CRYSTAL FINISH

---

### USE INSTRUCTIONS:

Crystal Finish is a concentrate and must be diluted with water to activate special cleaning agents. Depending on type of equipment used, vary dilution and contact time where necessary for greater or lesser cleaning.

For best results use 1 part of Crystal Finish to 50 parts of cold water.

Apply solution with brush or spray starting at the bottom and working upwards.

- Allow to stand two or three minutes, then rinse with cold water.

For difficult to clean surfaces, repeat if needed, allowing Crystal Finish to remain a little longer before flushing with water.

DO NOT allow Crystal Finish to come in contact with windshields or glass.

It is recommended to consult your sales representative for assistance in setting up your chemical product.
