Foldnak Compact

Unbeatable versatile

Bookletmaker and Trimmer in one unit

Unmistakable advantages

- The solution with the most variations and the largest range of formats
- Small footprint
- Ideal for small, medium and frequently changing numbers
- Possible to combine with SP + (square press) and S8 (collator)

We create a professional impression.

Unique and professional

For the first time, the functions of bookletmaking and trimming are combined in a single and compact unit. With the widest range of formats in its class and a short set-up time, it is particularly suited for small, medium and frequently changing numbers for digital or offset printing.

The Foldnak Compact is unbeaten in quality and the patented stapling-folding principle guarantees an exact position of the staples. Pressing before front trimming gives the booklet a sharp fold. The mobile **clinches** ensure a close fit of the staple and the in-feed belt **runs** a smooth paper transport. In addition, the Foldnak Compact is equipped with a side and front jogger (standard).

Especially valuable for digital printers: the Foldnak Compact works independently from any printing machine and is hence the perfect supplement to online machines. It is a suitable solution for printers who need to operate fast and flexible.

Foldnak Compact with SP + Compact + S8 collator

New: The Foldnak Compact will become a complete bookletmaking line, if combined with the SP + Compact.

The square pressing of the SP + Compact give the already stapled, folded and front trimmed booklet the appearance of a quality perfect binding.

The Foldnak Compact can of course be combined with the S8 collator.
