

JAGENBERG

EP# 929

Machine Type: Vari - Dur 45 - 21

Specification: Nominal trim width: 3100 mm

Serial No.: 30.21728 Delivery: 1972

Customer: Michigan Carton Company
Battle Creek / Michigan

Issue: X/72

01. General

The machine slits the web coming from the unwind into several longitudinal webs which are subsequently rewound.

The operating speed depends on the type of material, the basis weight and the quality of the unwinding reel.

01.1 Technical Data

The machine is intended for slitting and rewinding:

Board with a basis weight range from 270 to 780 gsm.

Max. web speed: 2000 fpm (610 m/min)

Max. rewind diameter: 84 " (2100 mm)

Nominal trim width: 122" (3100 mm)

Min. slitting width: 6" (150 mm)

Number of slitters: 6 standard top slitters

Rewind: for shaftless
rewinding on cores of
8", 12", 14" and 16" i.d.

Adjustment range of the
rewind: 13.3/4" (350 mm)
on each side

Main drive:)
Main drive gearing: } will be procured by
customer

Drive rating: required is 75 HP
per motor

Power supply: 460 V, 60 cycles
