

Ventless Booths

Conventional booths are inefficient because they deplete air, heat in the winter, and cool air in the summer. They also draw dust into them, creating finishing problems.

Why Ventless?

- No dust
- No heat loss
- No emission
- No air make up
- No roofing
- No money loss

Examples of some of the booths that Ventless offers

Sizes from 6' x 8' x 7' (VTLS6) to 20' x 20' x 14' (VTLS-XD Pro Industrial)

VTLS6 specifications:

6' x 8' x 7'

4200 – 5040 CFM
