New and used machines for the confectionery and chocolate industry

Sales list of used machines

2026-CW42

1.	G13148	1	Hollow body system COLLMANN Type HYDO-12, complete with casting machine, spinning section, cooling paternoster, for the continuous production of e.g. rabbits, Santa Clauses and similar products.
2.	G13523	1	SIG horizontal flow-wrap machine type HBM, built in 2004, featuring cold sealing, a double film tower, a splicer, and SICK photocell control for printed film. Output: approx. 400 items per minute.
3.	G13524	1	URSCHEL Model N cutting machine for chopping almonds and hazelnuts; built in 1997.
4.	G13525	1	Stephan mixer type UMB 40 E with a double-walled stainless steel vessel for heating up to a maximum of 130°C.
5.	G13515	1	Conche NETZSCH, Type Cocoeasy CE-300-LME-6 with built-in ball mill for grinding the mass
6.	G13492	1	WOLF Type S/K-420 three-way cooling tunnel with cooling sections on three levels, clad with insulation panels.
7.	G13493	1	GS-COATING Type CAR-200 mobile stainless steel vessel with double-wall construction and dissolver mixer.
8.	G13494	1	BARTH laboratory roaster (benchtop model) with three roasting drums arranged in a row and a gas heating system.
9.	G13483	1	OTTO KREMMLING twin-head soft mass former, type OKA-Automat-600, with two heads and a working width of approx. 600 mm.
10.	G13484	1	OTTO KREMMLING cutting unit, type HKE-B-08, with base frame, for cutting strands; year of manufacture 2021.
11.	G13486	1	HUTT BEPEX enrobing machine, type ÜZM-2000, stainless steel version.
12.	G13477	1	BÜHLER five-roll refiner, type SFL-1800, with a roll width of approx. 1,800 mm.
13.	G13478	1	CARLE + MONTANARI five-roll refiner, type HB-1300, with a working width of approx. 1,300 mm.
14.	G13480	1	WOLF drop depositing machine, type DDT-400, with a working width of approx. 400 mm and 104 nozzles in the nozzle plate; year of manufacture 2022.
15.	G13481	1	WOLF enrobing machine, type TC-420/UF-200, with a working width of approx. 420 mm; features integrated screw-type tempering and Freon cooling.
16.	G13482	1	WOLF tempering machine, type UF-200-P, with integrated gear pump; year of manufacture 2022.
17.	G13458	1	RASCH Type RK foil wrapping machine for flat-bottomed items, with outfeed conveyor and pressure station, but without infeed table.
18.	G13459	1	RASCH Type RU-D foil wrapping machine, with brush folding, outfeed conveyor and pressure station.
19.	G13460	1	KLÖCKNER & HÄNSEL Type HFA-1212 universal cooking mixer, manufactured in 1999. This machine is for cooking fondant, fillings, jams, and similar mixtures. Bowl capacity approx. 280 liters.

New and second hand machines for the confectionery and chocolate industry

20.	G13461	1	WOLF Type TC-320/UF-100 coating machine, manufactured in 1993. The machine features a negative belt path and a device for coating Baumkuchen sheets.
21.	G13454	1	KRÜGER & SALECKER BST-400.01 belt spreader with brush, mounted on a mesh conveyor belt, with control cabinet. Working width approximately 400–420 mm.
22.	G13455	1	Vibratory spreader, mounted on a mesh conveyor belt, with control cabinet. Working width approximately 400–420 mm.

23.	G13450	1	BÖHNKE & LUCKAU belt spreader Type BL-M1123-AD, manufactured in 2018. The spreader is mounted on a mesh conveyor belt with a collection tray. The control cabinet with operating panel is also mounted on the mesh conveyor belt.
24.	G13444	1	One-shot casting machine BÖHNKE & LUCKAU Type BL-3D OSL, manufactured in 2017. The machine has two mixing hoppers and a so-called boxer casting system. The nozzle plate currently has 3-4 rows x 9 nozzles.

25.	G13434	1	THÜRLINGS 30-D bag packing machine. The machine pulls bags from the magazine, opens them with finger grippers, and then fills them. The bags are sealed with a clip.
26.	G13375	1	PAGO labeling machine, type Pagomat 15/120-E, mounted on a stand on a conveyor belt.
27.	G13376	1	TER BRAAK sugaring drum.
28.	G13377	1	RUFFINATTI conveyor belt with laminating roller for candy masses.
29.	G13299	1	HEMA Type 73-A vertical cone roller for forming a candy strand, built in 1980.

30.	G13300	1	HEMA Type 50-A candy lollipop embossing machine with stick insert and Type 48-A leveling roller for the mass carpet, built in 1986.
31.	G13253	1	RASCH RG tin-foiling machine, designed for flat-bottomed products, built in 1993.
32.	G13085A	1	Forming system HOPPE/SOLLICH for marzipan or nougat strands, with extruder for 5 strands, pre-cooling channel and guillotine for cutting the strands to length.
33.	G13088	1	Dosing and pouring machine KREUTER Type FG-600 with 15 dosing pistons on approx. 600 mm working width, with drive chain for the powder boxes.

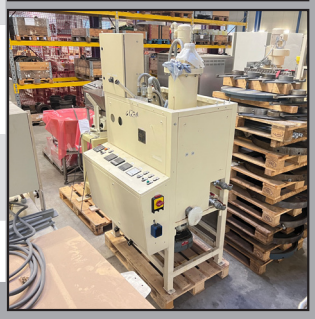

34.	G13062	1	Glazing machine „Disc-Coater" RADEMAKER with approx. 620 mm grid belt and two scattering discs.
35.	G13528	1	Knobel One-Shot depositor, model KCM-ALPHA X-NI-9/18-45, year of manufacture 2012.
36.	G13071 G13072	1	McIntyre lens-forming machine with a pair of rollers (approx. 420 mm working width and 300 mm roller diameter) and a water chiller for supplying cold water to the rollers.
37.	G13036	1	Napolitain winding machine SAPAL type BN-E for one foil wrapping from the roll, with ROBATECH gluing device. Output approx. 200 pieces per minute.

38.	G13011	1	Napolitain winding machine SAPAL type BN-E for external wrapping from the roll and label from the stack, with ROBATECH gluing device. Output approx. 200 pieces per minute.
39.	G13014	1	Napolitain winding machine SAPAL type BN-g for a paper from the roll with gluing device ROBATECH. Output approx. 200 pieces per minute.
40.	G12711	1	Nougat tempering machine SOLLICH type NT-300-N, year of manufacture 1986.

Kindly let us have your enquiries and offers of surplus machinery.

Best regards,
