

New and used machines for the confectionery and chocolate industry

Sales list of used machines

2026-CW30

1. G13476 1 SOLLICH-CHOCOTEC-STEPHAN protein bar production line featuring raw material feed, cooking system, base mass mixer, aerating machine for the second layer, roller former with cutting system, enrobing line with SOLLICH cooling tunnel, and downstream flow-wrap packaging. Output: approx. 180 bars per minute.

2. G13148 1 Hollow body system COLLMANN Type HYDO-12, complete with casting machine, spinning section, cooling paternoster, for the continuous production of e.g. rabbits, Santa Clauses and similar products.

3. G13436 1 Bindler casting system for mint coins with silicone molds for easier demolding and cooling carousel.

4. G13433 1 BÖHNKE & LUCKAU BL-OSD-600 one-shot casting machine, manufactured in 2018. The machine has two melt containers with agitators and a so-called boxer casting system.

5. G13111 1 Agitator container WOLF Type RB-2.0 with control cabinet and insulation.

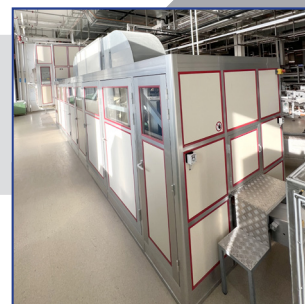

6. G12458 1 Forming and cooling roller WOLF Type F-1250 with a diameter of approx. 1000 mm for producing and depositing a mass carpet on a cooling channel.

7. G12459 1 Product breaking device WOLF for breaking a cooled mass carpet into small decorative flakes. Working width: approx. 1,300 mm.

8. G12430 1 Mold heating station WOLF Type W-RS-200 with hoods and radiant heaters. Working width approx. 420 mm and 4,000 mm length.

9. G12431 1 Mold filling station WOLF Type W-FW-200 for filling ornament molds with chocolate, which are drawn from a magazine and filled with chocolate. Set up for mold size approx. 410 x 310 x 5 mm. Working width approx. 420 mm.

10. G13480 1 WOLF drop depositing machine, type DDT-400, with a working width of approx. 400 mm and 104 nozzles in the nozzle plate; year of manufacture 2022.

11. G13481 1 WOLF enrobing machine, type TC-420/UF-200, with a working width of approx. 420 mm; features integrated screw-type tempering and Freon cooling.

12. G13482 1 WOLF tempering machine, type UF-200-P, with integrated gear pump; year of manufacture 2022.

13. G13417 1 WOLF PMN-6/420 nut-pile machine for producing items from a cereal-chocolate mix.

New and second hand machines for the confectionery and chocolate industry

14. G13419 1 WOLF PA-480 product feeder with five product compartments (approx. 50 mm) for cookies, wafers, etc., manufactured in 2020.
15. G13221 1 WOLF Type DRA-1200 banding machine for coating chocolate inserts, with a band width of 1,200 mm. Built in 2008.
16. G13222 1 WOLF Type LKTA-200 air cooling module, with integrated liquid cooler/water cooler WOLF Type FKL-907, built in 2008.

17. G13483 1 OTTO KREMMLING twin-head soft mass former, type OKA-Automat-600, with two heads and a working width of approx. 600 mm.
18. G13484 1 OTTO KREMMLING cutting unit, type HKE-B-08, with base frame, for cutting strands; year of manufacture 2021.
19. G13435 1 DÖINGHAUS USS-1000 ultrasonic cutting machine, manufactured in 2011. The machine has one infeed and one outfeed conveyor.

20. G13485 1 SOLLICH disc tempering machine, type MST-1000, designed for water cooling; capacity: approx. 1,000 kg of chocolate mass per hour; year of manufacture 1981.
21. G13486 1 HUTT BEPEX enrobing machine, type ÜZM-2000, stainless steel version.
22. G13487 1 SOLLICH disc tempering machine, type MST-1500-V, for cooling with cold water, year of manufacture 1986.

23. G13477 1 BÜHLER five-roll refiner, type SFL-1800, with a roll width of approx. 1,800 mm.
24. G13478 1 CARLE + MONTANARI five-roll refiner, type HB-1300, with a working width of approx. 1,300 mm.
25. G13462 1 Bühler two-roll refiner, Model SZAN-500, with a roll width of approx. 500 mm and a roll diameter of approx. 400 mm.

26. G13422 1 FIMA SRL SweetMagic packaging machine for folding and double-twisting rectangular chocolates, manufactured in 2020.
27. G13469 1 GRUPO FABRY VIGNOLA packaging machine, model Automac 55 PIU-B297, for packaging products on cardboard trays. Year of manufacture: 2020.

28. G13457 1 RASCH RG-STR foil wrapping machine, with end-folding unit, unwinding station with smoothing chain, equipped for Kinder Surprise eggs.
29. G13423 1 RASCH RU-EK foil wrapping machine for unwinding items, with end-folding unit and twisting station, as well as unwinding trough.

30. G13454 1 KRÜGER & SALECKER BST-400.01 belt spreader with brush, mounted on a mesh conveyor belt, with control cabinet. Working width approximately 400-420 mm.
31. G13455 1 Vibratory spreader, mounted on a mesh conveyor belt, with control cabinet. Working width approximately 400-420 mm.

Kindly let us have your enquiries and offers of surplus machinery.

Best regards,
