INSTRUCTION MANUAL

OPERATION MANUAL

 **HOWA MACHINERY, LTD.**

	PAGE
1. INTRODUCTION	1-1
2. SAFETY INSTRUCTIONS	2-1
3. SPECIFICATIONS OF MACHINE AND CNC	3-1
3-1 Standard specification of machine	3-1
3-2 Specification of CNC unit	3-2
3-3 M code list	3-3
3-4 G code list	3-4
3-5 Overall view	3-6
3-6 Strokes	3-7
3-7 Jig design reference	3-8
3-7-1 Interference	3-8
3-7-2 Details of the table	3-9
4. ENVIRONMENT, TRANSFER, and INSTALLATION	4-1
4-1 Working environment	4-1
(1) Place of installation	4-1
(2) Power supply	4-1
4-2 Lifting of machine	4-1
Fig.4-1 Machining center transfer work	4-2
Fig.4-2 Mounting fixing bracket	4-3
4-3 Installation	4-4
Fig.4-3 Connecting point of air-source	4-5
5. INSPECTIONS BEFORE TEST RUN	5-1
6. OPERATION	6-1
6-1 Function of operating parts	6-1
Fig.6-1 Layout of operator's panel	6-1
6-1-2 Optional switch / Indicator lamp	6-7
6-1-3 Toggle switch / Software switch	6-8
6-2 Preparation for operation	6-12
6-3 Manual operation	6-12
6-4 MDI operation	6-12
6-5 ATC sequence	6-13
6-6 Automatic operation	6-14

6-7	Handle operation	6-14
6-8	Routine operation procedure	6-16
6-9	Setting-up the tool	6-16
6-9-1	Attaching and detaching the tool	6-16
6-9-2	Tool offset	6-17
6-9-3	Boring shift direction setting	6-18
6-9-4	Restoration measures for POWER OFF and EMERGENCY STOP during ATC...	6-19
6-9-5	Description of display PLC-I/F	6-20
	(1) Display PLC-I/F screen	6-20
	(2) Display of PLC device data	6-20
	(3) Device data	6-20
	(4) How to turn the ALARM lamp	6-22
	(5) In case ATC cannot be returned to home position	6-23
7.	INTERLOCK	7-1
7-1	Axis movement	7-1
7-2	Spindle orientation	7-1
7-3	ATC operation (M6)	7-1
7-4	Magazine index by T-command	7-1
7-5	Automatic operation.....	7-1
8.	PROGRAMMING AND PROGRAM TRYOUT	8-1
8-1	Introduction	8-1
8-2	Setup before machining	8-1
8-3	Program registration and program running	8-3
8-3-1	New program registration	8-3
8-3-2	MDI data memory registration	8-3
8-3-3	Editing of program	8-4
8-3-4	Memory operation	8-4
8-4	Example of machining program	8-5
	A. Example of program using tool length compensation and canned cycle	8-5
	B. Example of program for cutter radius compensation	8-7
8-5	Basic program for others	8-9
9.	COOLANT UNIT(standard accessory) AND REMOVAL OF CHIPS	9-1
