SPECIAL FUNCTIONS MANUAL
(8th Edition)

LE31-069-R7

TABLE OF CONTENTS

PAGE

SECTION 1 PROGRAMMABLE TAILSTOCK POSITIONING FUNCTION (Tow-Along System) 1

1-1. OVERVIEW 1
1-2. SETTING INITIAL POSITION 2
1-3. MANUAL POSITIONING OF TAILSTOCK BODY 3
1-4. TAILSTOCK POSITIONING BY PROGRAMMED COMMANDS 4
1-5. PARAMETER SETTING 6
1-6. SYSTEM PARAMETERS 14
1-7. ALARM MESSAGES 15

SECTION 2 SPINDLE ORIENTATION 19

2-1. OVERVIEW OF SPINDLE ORIENTATION FUNCTION 19
2-2. PROGRAMMING FORMAT 19
2-3. DATA SETTING 21
2-4. M19 COMMAND PROGRAMMED WHILE SPINDLE IS AT A STILL 22
2-5. PROGRAM EXAMPLES 24
2-6. REMARKS 25

SECTION 3 CYCLE TIME CALCULATION FUNCTION 26

3-1. OVERVIEW OF CYCLE TIME CALCULATION FUNCTION 26
3-2. CYCLE TIME CALCULATION PROCESS 26
3-3. CRT DISPLAY OF MACHINE TIME DATA 27
3-4. OPERATION PROCEDURE 28

SECTION 4 OVERLOAD DETECTION 29

4-1. OVERVIEW OF OVERLOAD DETECTION FUNCTION 29
4-2. SETTING MONITOR RANGE 29

4-3. PROGRAM EXAMPLES 29
4-3-1. For One-Saddle Model 29
4-3-2. For Two-Saddle Model 3Ø

4-4. SETTING LIMIT CURRENT VALUE 3Ø
4-5. SETTING DETECTION TIME 31
4-6. SETTING ALARM LEVEL 31
4-7. ALARM MESSAGES 32

PAGE

SECTION 5 GAUGING DATA PRINT OUT FUNCTION 34

5-1. OVERVIEW OF GAUGING DATA PRINT OUT FUNCTION 34
5-2. CONDITIONS FOR DATA PRINT OUT 35
5-3. CONTENTS OF PRINT OUT DATA 36
5-4. PRINT OUT FORMAT 37

5-5. INTERFACE FOR RP-8Ø LINK 38
5-5-1. Parameter Setting at OSP5ØØL-G/OSP5ØØØL-G 38
5-5-2. Switch Setting at RP-8Ø 4Ø
5-5-3. Connection of RP-8Ø to OSP5ØØØL-G 41

SECTION 6 ALARM DATA PRINT OUT FUNCTION 44

6-1. OVERVIEW OF ALARM DATA PRINT OUT FUNCTION 44
6-2. CONDITIONS FOR DATA PRINT OUT 45
6-3. CONTENTS OF PRINT OUT DATA 46
6-4. PRINT OUT FORMAT 46

SECTION 7 SLIDE HOLD FUNCTION DURING THREAD CUTTING CYCLE (G34, G35, G112, G113) 47

7-1. OVERVIEW 47
7-2. PROGRAM EXAMPLES 48
7-3. PRECAUTIONS 51

SECTION 8 COORDINATE CONVERSION 53

8-1. OVERVIEW OF COORDINATE CONVERSION FUNCTION 53
8-2. CONVERSION METHOD 54
8-3. PROGRAM EXAMPLES 54
8-4. PRECAUTIONS 55
8-5. ALARM MESSAGES 56

SECTION 9 PITCH ERROR COMPENSATION FOR X, Z AND C AXES 57

9-1. OVERVIEW OF PITCH ERROR COMPENSATION FUNCTION 57

9-2. DATA SETTING 57
9-2-1. Data to be Set 57
9-2-2. Data Setting Procedure 59
9-2-3. Data Setting Range 63
9-2-4. Compensation Data Backup Function 63
9-2-5. Alarm Messages 65

9-3. COMPENSATION METHOD 66

PAGE

SECTION 1Ø NC OPERATION MONITOR 67

1Ø-1. OVERVIEW OF NC OPERATION MONITOR 67
1Ø-2. CONTENTS OF DISPLAY AND COUNT-UP CONDITIONS OF NC WORK COUNTER 67
1Ø-3. ALARM CONDITIONS FOR NC WORK COUNTER 68
1Ø-4. CONTENTS OF NC HOUR METER DISPLAY AND COUNT-UP CONDITIONS 69
1Ø-5. ALARM CONDITIONS OF NC HOUR METER 7Ø

SECTION 11 DNC-A 72

11-1. FUNCTIONS 72

11-2. OPERATING PROCEDURES 73
11-2-1. Downloading an NC Program (File) 75
11-2-2. Unloading an NC Program (File) 76

11-3. SETTING UP NC OPTIONAL PARAMETERS 77
11-3-1. NC Optional Parameter (Bit) No. 2 77
11-3-2. NC Optional Parameter (Word) No. 46 77
11-3-3. NC Optional Parameter (Bit) No. 1 77
11-3-4. NC Optional Parameter (Bit) Nos. 12 - 16 78
11-3-5. RS-232C Interface Parameters for CN0: (TT:) through CN4: 78

11-4. ERROR MESSAGES 78

11-5. SPECIFICATIONS 79
11-5-1. Data Formats 79
11-5-2. Example RS-232C Interface Connections and Timing Charts 82

SECTION 12 PROGRAM LENGTH EXPANSION SPECIFICATION 92

12-1. OVERVIEW OF PROGRAM LENGTH EXPANSION SPECIFICATION 92
12-2. PRECAUTIONS 92

SECTION 13 AUTOMATIC ANY-ANGLE CHAMFERING 93

13-1. OVERVIEW OF AUTOMATIC ANY-ANGLE CHAMFERING FUNCTION 93
13-2. C-CHAMFERING (G75) 93
13-3. R-CHAMFERING (G76) 94
13-4. PRECAUTIONS 95
13-5. ALARM MESSAGES 96

SECTION 14 EDIT INTERLOCK FUNCTION 99

14-1. OVERVIEW OF EDIT INTERLOCK FUNCTION 99

PAGE

SECTION 15 CYCLE START DISABLING FUNCTION USING PRESET COUNTER 1ØØ

15-1. OVERVIEW OF CYCLE START DISABLING FUNCTION USING PRESET COUNTER 1ØØ

SECTION 16 OPERATION END LAMP/ALARM LAMP 1Ø1

16-1. OPERATION END LAMP 1Ø1
16-2. ALARM LAMP 1Ø1

SECTION 17 CYCLE TIME REDUCTION FUNCTION 1Ø2

17-1. IGNORING SPINDLE ROTATION ANSWER, M63 ..... 1Ø2
17-2. IGNORING ANSWER SIGNALS FOR M CODES OTHER THAN SPINDLE ROTATION CONTROL, M64 ..... 1Ø3
17-3. IGNORING ANSWER SIGNALS FOR T COMMANDS, M65 ..... 1Ø4
17-4. FREE TURRET INDEXING POSITION, M66 ..... 1Ø4

SECTION 18 TOOL LIFE MANAGEMENT 1Ø5

18-1. OVERVIEW OF TOOL LIFE MANAGEMENT FUNCTION 1Ø5
18-2. SELECTION OF TOOL LIFE CONDITIONS 1Ø6

18-3. SETTING TOOL LIFE DATA AND DISPLAY OF TOOL LIFE DATA 1Ø7
18-3-1. Data Setting Procedure 1Ø7
18-3-2. Initializing Tool Life Control Table 113

18-4. PROGRAMMING 115
18-5. PROCESSING AFTER ALL SPARE TOOLS HAVE BEEN USED UP 116
18-6. ALARM MESSAGES 117

SECTION 19 PHASE MATCHING FUNCTION FOR THREAD CUTTING OPERATIONS 118

19-1. OVERVIEW OF FUNCTION 118
19-2. M CODES 118
19-3. OPERATIONS 119
19-4. PRECAUTIONS 126

SECTION 2Ø CALENDAR TIMER 128

2Ø-1. OVERVIEW OF CALENDAR TIMER 128
2Ø-2. WARMING UP PROGRAM 128
2Ø-3. ALARM MESSAGES 129
2Ø-4. M CODES FOR CANCELING INTERLOCK FUNCTIONS 129

PAGE

SECTION 21 EXTERNAL PROGRAM SELECTION A (PUSHBUTTON TYPE) 13Ø

21-1. OVERVIEW OF EXTERNAL PROGRAM SELECTION A 13Ø
21-2. MAIN AND SCHEDULE PROGRAM SELECTION 13Ø
21-3. INHIBITING THE SELECTION OF THE SAME PROGRAM 13Ø
21-4. PROGRAM SELECTION 13Ø
21-5. PRECAUTIONS 131
21-6. ALARM MESSAGES 131

SECTION 22 EXTERNAL PROGRAM SELECTION B (ROTARY SWITCH TYPE) 132

22-1. OVERVIEW OF EXTERNAL PROGRAM SELECTION B 132
22-2. MAIN AND SCHEDULE PROGRAM SELECTION 132
22-3. INHIBITING THE SELECTION OF THE SAME PROGRAM 132
22-4. PROGRAM SELECTION 132
22-5. PRECAUTIONS 133
22-6. ALARM MESSAGES 133
22-7. LAMP INDICATION 134
22-8. CYCLE START INTERLOCK USING PART PROGRAM 134

SECTION 23 EXTERNAL PROGRAM SELECTION C (BCD SYSTEM) 136

23-1. OVERVIEW OF EXTERNAL PROGRAM SELECTION C 136
23-2. TYPES OF SELECTABLE PROGRAMS 136
23-3. MAIN AND SCHEDULE PROGRAM SELECTION 136
23-4. INHIBITING THE SELECTION OF THE SAME PROGRAM 136
23-5. PRECAUTIONS 137
23-6. ALARM MESSAGES 138

SECTION 24 CHUCK OPEN/CLOSE BY M CODES 139

24-1. M CODES USED FOR CHUCK OPEN/CLOSE 139
24-2. ALARM MESSAGES 139

SECTION 25 CANCELLATION OF CHUCK OPEN/CLOSE INTERLOCK BY M CODES 141

25-1. OVERVIEW OF CHUCK OPEN/CLOSE INTERLOCK CANCEL FUNCTION 141
25-2. M CODES USED FOR CANCELING CHUCK OPEN/CLOSE INTERLOCK 141

SECTION 26 CHUCK HIGH/LOW PRESSURE SELECTION BY M CODES 142

26-1. OVERVIEW OF CHUCK HIGH/LOW PRESSURE SELECTION FUNCTION 142
26-2. M CODES USED FOR CHUCK HIGH/LOW PRESSURE SELECTION 142

PAGE

SECTION 27 INDEX CHUCK 143

27-1. M CODES USED FOR INDEXING THE INDEX CHUCK 143
27-2. ALARM MESSAGES 143

SECTION 28 LONG STROKE CHUCKING FUNCTION 144

28-1. OVERVIEW OF LONG STROKE CHUCKING FUNCTION 144
28-2. M CODES USED FOR LONG STROKE CHUCKING FUNCTION 144
28-3. DESIGNATION OF CHUCK OPEN POSITION 144
28-4. CHUCK OPEN AND CLOSE OPERATION BY M83 AND M84 145
28-5. ALARM MESSAGES 145

SECTION 29 CHUCKING ERROR DETECTION 146

29-1. OVERVIEW OF CHUCKING ERROR DETECTION FUNCTION 146
29-2. M CODE USED FOR DETECTING CHUCKING ERROR 146
29-3. PARAMETER SETTING 146
29-4. ALARM MESSAGE 146

SECTION 3Ø TAILSTOCK SPINDLE ADVANCE/RETRACTION BY M CODES (WITH CONFORMATION LIMIT SWITCHES) 147

3Ø-1. M CODES USED FOR CHUCK OPEN/CLOSE 147
3Ø-2. ALARM MESSAGES 147

SECTION 31 TAILSTOCK SPINDLE HIGH/LOW THRUST SELECTION BY M CODES 149

31-1. OVERVIEW OF TAILSTOCK SPINDLE HIGH/LOW THRUST SELECTION 149
31-2. M CODES USED FOR SELECTING HIGH/LOW TAILSTOCK SPINDLE THRUST 149

SECTION 32 CANCELLATION OF CENTER WORK INTERLOCK BY M CODES 15Ø

32-1. OVERVIEW OF CENTER WORK MODE CANCELLATION FUNCTION 15Ø
32-2. M CODES USED FOR CANCELING CENTER WORK INTERLOCK 15Ø
32-3. PROGRAM EXAMPLE 15Ø

SECTION 33 TAILSTOCK SPINDLE ADVANCE/RETRACTION DURING SPINDLE ROTATION BY M CODES 151

33-1. OVERVIEW OF TAILSTOCK SPINDLE ADVANCE/RETRACTION DURING SPINDLE ROTATION 151
33-2. M CODES USED FOR ADVANCING AND RETRACTING TAILSTOCK SPINDLE 151
33-3. PROGRAM EXAMPLE 151

PAGE

SECTION 34 WORK RESET CLAMP/UNCLAMP AND ADVANCE RETRACT BY M CODES 152

34-1. M CODES USED FOR CLAMPING/UNCLAMPING AND ADVANCING/RETRACTING WORK RESET 152

SECTION 35 AUTOMATIC FRONT DOOR OPEN/CLOSE BY M CODES 153

35-1. OVERVIEW OF AUTOMATIC FRONT DOOR OPEN/CLOSE FUNCTION 153
35-2. M CODES USED FOR OPENING/CLOSING THE FRONT DOOR 153

SECTION 36 FRONT DOOR INTERLOCK FUNCTION 154

36-1. OVERVIEW OF FRONT DOOR INTERLOCK FUNCTION 154
36-2. DESCRIPTION OF OPERATION 154
36-3. ALARM MESSAGES 154

SECTION 37 UNLOADER ADVANCE/RETRACT BY M CODES 155

37-1. M CODES USED FOR ADVANCING/RETRACTING UNLOADER 155

SECTION 38 LOADER INTERLOCK FUNCTION 156

38-1. M CODES USED FOR LOADER OPERATIONS 156
38-2. DESCRIPTION OF LOADER CONTROL SWITCH 156
38-3. ALARM MESSAGES 156

SECTION 39 SWING ARM LOADER ADVANCING/RETRACTING BY M CODES 157

39-1. M CODES USED FOR ADVANCING/RETRACTING SWING ARM LOADER 157

SECTION 4Ø WORK CATCHER ADVANCING/RETRACTING BY M CODES 158

4Ø-1. M CODES USED FOR ADVANCING/RETRACTING WORK CATCHER 158

SECTION 41 BAR FEEDER INTERLOCK FUNCTION 159

41-1. M CODES USED FOR OPERATING BAR FEEDER 159
41-2. TOP-CUT 159
41-3. EXAMPLE OF PROGRAM 159
41-4. ALARM MESSAGES 16Ø
41-5. AUTOMATIC CONTINUOUS OPERATION 16Ø

PAGE

SECTION 42 SPARE AIR BLOWER FUNCTION 161

42-1. M CODES USED FOR TURNING ON/OFF SPARE AIR BLOW 161
42-2. M CODES USED FOR TURNING ON/OFF SPARE AIR BLOW 161

SECTION 43 SPINDLE JOGGING FUNCTION WHEN AIR BLOWER IS COMMANDED 162

43-1. OVERVIEW OF SPINDLE JOGGING FUNCTION WHEN AIR BLOWER IS COMMANDED .. 162
43-2. OPERATION 162

SECTION 44 ROBOT INTERLOCK FUNCTION 163

44-1. OVERVIEW OF ROBOT INTERLOCK FUNCTION 163
44-2. M CODES USED FOR OPERATING ROBOT 163
44-3. ALARM MESSAGES 163

SECTION 45 COOLANT HIGH/LOW PRESSURE SELECTION FUNCTION BY M CODES 164

45-1. OVERVIEW OF COOLANT HIGH/LOW PRESSURE SELECTION FUNCTION 164
45-2. M CODES USED FOR SELECTING HIGH/LOW COOLANT PRESSURE 164

SECTION 46 TAILSTOCK SWING OPERATION (LB1Ø only) 165

46-1. OVERVIEW 165

46-2. OPERATIONS 165
46-2-1. Operation by Pushbuttons 165
46-2-2. Operation by M Codes 165
46-2-3. Remarks 165
46-2-4. Interlock Conditions 165

46-3. ALARM 166

SECTION 47 TAPE PUNCH INTERFACE FUNCTION 167

47-1. FUNCTION OVERVIEW 167
47-2. SPECIFICATIONS 167
47-3. OPERATION PROCEDURES 167

47-4. PARAMETER SETTING 175
47-4-1. Setting of NC Optional Parameter (Bit) 175
47-4-2. Setting of NC Optional Parameter (Word) 182

47-5. RS232C PINS AND CORRESPONDING SIGNALS 185
47-6. SIGNAL DESCRIPTION 187
47-7. EXTERNAL DEVICE CONNECTION 19Ø

PAGE

47-8. DC CODE CONTROL 195
47-8-1. Transmission Codes 195
47-8-2. External Device Connection 195

47-9. SLAVE STATION FUNCTION 199
47-9-1. Connection Example with External Device in Slave Station Function 199
47-9-2. Connection Example with External Device in Slave Station Function 200
47-9-3. When OSPs Are Linked Each Other Using the Slave Station Function 201

47-10. EIA SPECIAL CODES 203
47-10-1. Setting of EIA Special Characters 204
47-10-2. Input/Output of the Special EIA Codes 204

47-11. ERROR MESSAGES 206
47-12. TAPE PUNCH CONNECTION EXAMPLES 213

SECTION 48 OVERLOAD MONITORING FUNCTION 233

48-1. FUNCTION OVERVIEW 233
48-2. OVERVIEW OF OPERATIONS 233

48-3. PROGRAMS 234
48-3-1. Format of System Variable VLMON 234
48-3-2. Monitoring ON/OFF Command 235
48-3-3. Monitoring on Multiple Parts 235
48-3-4. Programming on Two-saddle Models 236
48-3-5. Rapid Feed Ignoring Function (M215, M216) 237
48-3-6. Load Trace Display Clear Command (LCLEAR) 237

48-4. SETTING OF LIMIT LEVELS 238
48-4-1. Automatic Setting Method 238
48-4-2. Direct Setting of Limit Levels 239

48-5. LOAD MONITORING 241
48-6. LOAD MONITORING GRAPHIC DISPLAY (LOAD TRACE DISPLAY) 242
48-7. LOAD MONITORING FUNCTION USED IN COMBINATION WITH THE TOOL LIFE MANAGEMENT FUNCTION 244
48-8. SETTING OF PERCENT VALUE AT THE MAXIMUM INPUT OF SPINDLE AND M-TOOL SPINDLE DRIVE MOTORS 245
48-9. PARAMETERS 246
48-10. ALARM MESSAGES 249

SECTION 49 TAPE DATA INPUT/OUTPUT FUNCTION 250
49-1. OVERVIEW 250
49-2. FUNCTION APPLICATION 251

PAGE

49-3. INPUT/OUTPUT TAPE FORMAT OF SETTING DATA 251
49-3-1. File Names 251
49-3-2. Tape Format Table 252
49-3-3. Actual Tape Format 256

49-4. OPERATION PROCEDURES 258
49-4-1. Data Input (READ) 259
49-4-2. Data Output (PUNCH) 261
49-4-3. Data Verify 264
49-4-4. Precautions on Tape Read-in, Punch Out and Verifying Operations 266

49-5. ERROR MESSAGES 268

SECTION 5Ø NC MACHINING PROGRAM INPUT/OUTPUT FUNCTIONS BY FLOPPY DISKS (OSP FORMAT) 271

5Ø-1. OVERVIEW 271
5Ø-2. CONFIGURATION 271
5Ø-3. METHOD OF OPERATION 272

5Ø-4. EXPLANATION OF OPERATIONS 274
5Ø-4-1. Types of Floppy Disks 278
5Ø-4-2. INIT: Initialize 279
5Ø-4-3. DEL: Delete 282
5Ø-4-4. RENAME: Name Change 282
5Ø-4-5. DIR: Directory 283
5Ø-4-6. FREE: Remaining Floppy Disk Area 283
5Ø-4-7. LIST: List of Files 284
5Ø-4-8. READ: Reading from Tape Reader 285
5Ø-4-9. Output of Files to the Tape Punch 286
5Ø-4-1Ø. Verify 287
5Ø-4-11. Read from Bubble Memory 288
5Ø-4-12. Data Transmission to Bubble Memory 289
5Ø-4-13. Floppy Disk File Edit 29Ø
5Ø-4-14. IGF Floppy Disk Files (optional) 291
5Ø-4-15. IGF Floppy Disk File Conversion (optional) 292
5Ø-4-16. Floppy Disk File Conversion (optional) 293
5Ø-4-17. Floppy Disk File Protection 294
5Ø-4-18. Floppy Disk File Data Transfer (PIP) (optional) 294

5Ø-5. INTERFACING SPECIFICATIONS 295
5Ø-5-1. Floppy Disk Drive Connector Board (FDC Board) 295
5Ø-5-2. Floppy Disk Drive Connector Cable 297
5Ø-5-3. Portable Floppy Disk Drive Unit 299

SECTION 51 NC MACHINING PROGRAM INPUT/OUTPUT FUNCTIONS BY FLOPPY DISKS (IBM FORMAT) 3ØØ

51-1. OVERVIEW 3ØØ

PAGE

51-2. OPERATIONS 3Ø1
51-2-1. Directory 3Ø1
51-2-2. Copy 3Ø5
51-2-3. Free (Remaining Floppy Disk Capacity) 312
51-2-4. Initializing 313
51-2-5. Deletion 316
51-2-6. Rename 319
51-2-7. Protect 321

51-3. PRECAUTIONS ON I/O FUNCTIONS USING FLOPPY DISKS 326
51-3-1. Parameter Setting 356
51-3-2. Usage of File Name 328

51-4. CODE TABLES 331

51-5. FLOPPY DISK FORMAT (IBM FORMAT) 335
51-5-1. Index Cylinder 337
51-5-2. Faulty Cylinder Information 34Ø
51-5-3. Volume Label Information 342
51-5-4. File Directory 344
51-5-5. Floppy Disk Information Used in OSP Series 347
51-5-6. Examples 348
51-5-7. Data Writing Method 349

SECTION 52 M-SPINDLE FLAT TURNING FUNCTION 362

52-1. OVERVIEW 362
52-2. FLAT TURNING PRINCIPLE 362

52-3. COMMANDS 365
52-3-1. Flat Turning ON/OFF M Code 365
52-3-2. Program Example 366

52-4. PARAMETERS 366
52-4-1. Flat Turning Mode, M Spindle Zero Offset 366
52-4-2. System Variables 366
52-4-3. SB Command Acceleration/Deceleration Unit Amount 367

52-5. DISPLAY 367

52-6. ALARM 367
52-6-1. Alarm B 367
52-6-2. Alarm A 368

52-7. CAUTIONS 368

PAGE

SECTION 53 TOUCH SETTER M 369

53-1. CONFIGURATION OF TOUCH SETTER M 369

53-2. PROGRAM COMMANDS 37Ø
53-2-1. Defining Thread Cutting Arc by Designating Arc Center 37Ø
53-2-2. Defining Thread Cutting Arc by Designating Arc Radius 375

53-3. PROGRAM EXAMPLE 376
53-4. CAUTION 377

SECTION 54 WORK COUNTER 378

54-1. OVERVIEW 378
54-2. COUNTER APPEARANCE AND ITS LOCATION ON OPERATION PANEL 378
54-3. FUNCTIONS 379
54-4. PROGRAM EXAMPLE 38Ø
54-5. CAUTIONS 383
54-6. HOW TO PRESET 383

SECTION 55 PICK-OFF ATTACHMENT 384

55-1. AUTOMATIC OPEN/CLOSE OF PICK-OFF ATTACHMENT 384
55-2. M-SPINDLE ROTATION INTERLOCK 384
55-3. M-SPINDLE ROTATION INTERLOCK IGNORE FUNCTION 384
55-4. ALARM MESSAGES 385

SECTION 56 CUT-OFF DEVICE 386

56-1. M CODES USED FOR CONTROLLING CUT-OFF DEVICE 386

SECTION 57 TOOL RETRACTION CYCLE 387

57-1. OVERVIEW 387

57-2. INTERRUPTION REQUEST SIGNAL 388
57-2-1. Internal Signal Generation 388
57-2-2. External Signals 388

57-3. PROGRAM 389
57-3-1. Main Program 389
57-3-2. Subprograms 39Ø
57-3-3. Program Example 39Ø

57-4. OPERATION DESCRIPTION 392
57-5. OTHERS 393
57-6. ALARM MESSAGES 395

PAGE

SECTION 58 HOUR METER 396

58-1. OVERVIEW 396
58-2. APPEARANCE OF THE HOUR METER AND ITS INSTALLATION LOCATION 396
58-3. FUNCTION DESCRIPTION 397

SECTION 59 3RD TURRET 398

59-1. OUTLINE OF 3RD TURRET AND PICK OFF SPINDLE 398
59-2. PROGRAMMING 399
59-3. MANUAL OPERATIONS 4Ø8
59-4. PARAMETER SETTING 412
59-5. ZERO SETTING 417
59-6. TOOL DATA 418
59-7. ALARM MESSAGES 419

SECTION 6Ø HOME POSITION FUNCTION 423

6Ø-1. OVERVIEW OF HOME POSITION FUNCTION 423

6Ø-2. PARAMETERS 423
6Ø-2-1. Home Position Setting Screen Display Method 423
6Ø-2-2. Home Position Setting Screen 424
6Ø-2-3. Home Position Data 425

6Ø-3. COMMANDS 425
6Ø-4. REMARKS 426
6Ø-5. ALARM 426

Note: To avoid any confusion over the use of the letter "O (oh)" and figure "0 (zero)" in this manual, the numerical value "0 (zero)" is expressed as "Ø" if there is any possibility of misunderstanding.
