

HORIZONTAL MACHINING CENTER

A55

Version D

PROGRAMMING MANUAL

WARNING

- 1. Do not operate, maintain, or inspect the machine before you read intensively and understand this Instruction Manual.**
- 2. Store this Instruction Manual with care so that you can consult it as necessary in performing operation, maintenance or inspection of the machine.**

PROGRAMMING

Contents

	FUNDAMENTALS OF PROGRAMMING	1.1- 1
1	NC and Programming	1.1- 1
2	Fundamental Knowledge of Programming	1.2- 1
3	Programming for Basic Motions.....	1.3- 1
4	Programming for commonly Used Functions.....	1.4- 1
5	Summary	1.5- 1
	 PROGRAMMING FOR BASIC MACHINING.....	 2.1- 1
1	Machining Drawing and Blank Drawing	2.1- 1
2	Plane Cutting with Face Mill	2.2- 1
3	Side Cutting with End Mill	2.3- 1
4	Pocket Cutting with End Mill	2.4- 1
5	Hole Machining with Drill and Tap.....	2.5- 1
6	Boring	2.6- 1
	 PROGRAMMING FOR MACHINING CENTER.....	 3.1- 1
1	Tool Length Compensation	3.1- 1
2	Registering Tool Number	3.2- 1
3	Program for Tool Change.....	3.3- 1
4	ATC Program Containing Tool Length Compensation	3.4- 1
5	Program for B-axis Indexing	3.5- 1
6	Program for Pallet Change	3.6- 1
	 MACHINING PROGRAMS WITH MACHINING CENTER.....	 4.1- 1
1	Machining Containing ATC	4.1- 1
2	Machining Containing B-axis Indexing.....	4.2- 1
3	Machining Containing Pallet Change.....	4.3- 1

1	Fundamentals of Programming	1.1-1
1.1	NC and Programming	1.1-1
1.1.1	NC and NC machine tools	1.1-1
1.1.2	Programming	1.1- 2
1.2	Fundamental Knowledge of Programming	1.2-1
1.2.1	Machine movements and coordinate systems	1.2-1
1.2.2	Amount of movement, and setting unit	1.2-4
1.2.3	Absolute command and incremental command	1.2-6
1.2.4	Machine coordinate system and work coordinate system	1.2-9
1.2.5	M function, S function, and F function	1.2-12
1.2.6	Composition of program.....	1.2-14
1.2.7	NC tape and CRT screen.....	1.2-15
1.3	Programming for Basic Motions	1.3-1
1.3.1	Positioning G00.....	1.3-1
1.3.2	Linear interpolation G01.....	1.3-2
1.3.3	Circular interpolation G02,G03	1.3-7
1.3.4	Plane Selection	1.3-8
1.3.5	Z-Axis Movement	1.3-11
1.3.6	Program examples	1.3-12
1.4	Programming for commonly Used Functions	1.4-1
1.4.1	Tool Radius Compensation	1.4-1
1.4.2	Subprogram	1.4-10
1.4.3	Canned Cycle	1.4-15
1.5	Summary	1.5-1
1.5.1	Kind and Meaning of Addresses	1.5-1
1.5.2	Commonly Used Preparatory Function (G Code)	1.5-2

2. PROGRAMMING FOR BASIC MACHINING	2.1- 1
2.1 Machining Drawing and Blank Drawing	2.1- 1
2.2 Plane Cutting with Face Mill.....	2.2- 1
2.3 Side Cutting with End Mill	2.3- 1
2.4 Pocket Cutting with End Mill	2.4- 1
2.5 Hole Machining with Drill and Tap	2.5- 1
2.6 Boring	2.6- 1

3. PROGRAMMING FOR MACHINING CENTERS 3.1- 1

3.1 Tool Length Compensation 3.1- 1

3.2 Tool Number registration 3.2- 1

3.3 Program for Tool Change 3.3- 1

3.4 ATC Program Containing Tool Length Compensation 3.4- 1

3.5 Program for B Axis Indexing 3.5- 1

3.6 Program for Pallet Change 3.6- 1

4. MACHINING PROGRAMS WITH MACHINING CENTER	4.1- 1
4.1 Machining Containing ATC	4.1- 1
4.2 Machining Containing B-axis Indexing	4.2- 1
4.3 Machining Containing Pallet Change	4.3- 1

APPENDIX

CONTENTS

List of M Codes	Appendix A- 1
List of Alarms	Appendix B- 1
Pactical Machining Data table	Appendix C- 1
