

(INSTRUCTION MANUAL)

"MARK" SERIES NC POWER UNIT FOR NC EDM  
MACHINING CONDITIONS SETTING INSTRUCTIONS  
&  
JIGS AND TOOLS, AND DIELECTRIC PROCESSING

(FOR MARK X.XI)

**FINE Sodick**  
SODICK Co., Ltd.

**Vol.2.2**

**MACHINING CONDITIONS SETTING INSTRUCTIONS**

## CONTENTS

1. BASICS FOR SETTING ELECTRICAL DISCHARGE MACHINING CONDITIONS	
1) NC EDM Spark Discharge.....	1
2) Voltage and Current Waveforms.....	5
3) Open-Circuit Voltage between Electrodes and Mean Machining Voltage.....	7
4) Pulse Energy and Mean Machining Current.....	9
2. MACHINING CONDITIONS SETTING PROCEDURE AND PARAMETERS	
1) Machining Conditions Calling and Setting Procedures.....	12
2) Individual-File Conditions Setting and Modification.....	28
3) Types of C Code Parameters.....	29
4) Pulse Setting Parameters.....	30
5) Machining Condition Adjusting Parameters.....	42
6) SIX-LORAN Motion Parameters.....	48
3. MACHINING PERFORMANCE VARIATION	
1) EDM Machining Performance Factors.....	50
2) Surface Roughness and Machining Rate Characteristics.....	51
3) Electrode Wear Ratio and No-wear.....	58
4) Cu-St $\pm$ (Reversed Polarity) Machining Characteristic Data.....	62
5) GRAPHITE-STEEL DATA COLLECTION METHOD.....	70
6) Cuw-STEEL DATA COLLECTION METHOD.....	86
7) TEST FOR CHANGING OF 3PHASE INPUT VOLTAGE.....	93

JIGS AND TOOLS, AND DIELECTRIC PROCESSING

## CONTENTS

### 1. NC EDM JIGS AND TOOLS

- 1) List of Instruments, Tools and Materials  
Required for NC EDM - - - - - 1
- 2) Electrode Holders and Shanks - - - - - 4
- 3) Workpiece Mounting Jigs and Tools - - - - - 18

### 2. DIELECTRIC PROCESSING

- 1) Conception of Dielectric Processing - - - - - 26
- 2) Injection Flushing - - - - - 30
- 3) Suction Flushing - - - - - 38
- 4) Side Flushing - - - - - 41
