

C200H

Operation Manual

Revised December 1992

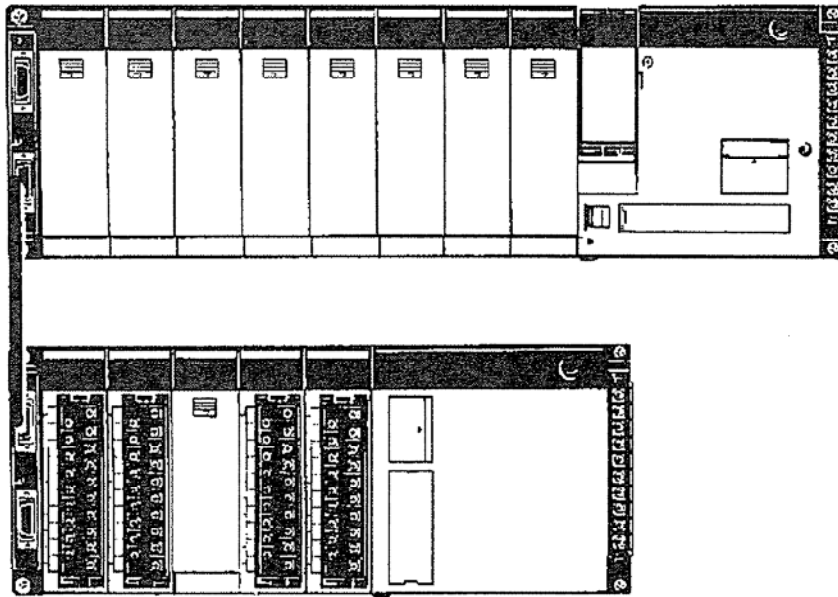

TABLE OF CONTENTS

SECTION 1

Introduction	1
1-1 Overview	2
1-2 The Origins of PC Logic	2
1-3 PC Terminology	3
1-4 OMRON Product Terminology	4
1-5 Overview of PC Operation	4
1-6 Peripheral Devices	5
1-7 Available Manuals	7

SECTION 2

Hardware Considerations	9
2-1 Indicators	10
2-2 PC Configuration	10

SECTION 3

Memory Areas	13
3-1 Introduction	14
3-2 Data Area Structure	14
3-3 IR (Internal Relay) Area	16
3-4 SR (Special Relay) Area	18
3-5 AR (Auxiliary Relay) Area	29
3-6 DM (Data Memory) Area	35
3-7 HR (Holding Relay) Area	38
3-8 TC (Timer/Counter) Area	38
3-9 LR (Link Relay) Area	39
3-10 Program Memory	39
3-11 TR (Temporary Relay) Area	39

SECTION 4

Writing and Inputting the Program	41
4-1 Basic Procedure	42
4-2 Instruction Terminology	42
4-3 Basic Ladder Diagrams	43
4-4 The Programming Console	56
4-5 Preparation for Operation	60
4-6 Inputting, Modifying, and Checking the Program	70
4-7 Controlling Bit Status	87
4-8 Work Bits (Internal Relays)	88
4-9 Programming Precautions	90
4-10 Program Execution	92

SECTION 5

Instruction Set	93
5-1 Notation	96
5-2 Instruction Format	96
5-3 Data Areas, Definer Values, and Flags	96
5-4 Differentiated Instructions	98
5-5 Coding Right-hand Instructions	98
5-6 Ladder Diagram Instructions	101

5-7 Bit Control Instructions	103
5-8 INTERLOCK and INTERLOCK CLEAR – IL(02) and ILC(03)	107
5-9 JUMP and JUMP END – JMP(04) and JME(05)	109
5-10 END – END(01)	110
5-11 NO OPERATION – NOP(00)	111
5-12 Timer and Counter Instructions	111
5-13 Data Shifting	122
5-14 Data Movement	131
5-15 Data Comparison	140
5-16 Data Conversion	148
5-17 BCD Calculations	160
5-18 Binary Calculations	177
5-19 Logic Instructions	182
5-20 Subroutines and Interrupt Control	185
5-21 Step Instructions	191
5-22 Special Instructions	200
5-23 SYSMAC NET Link/SYSMAC LINK Instructions	209

SECTION 6

Program Execution Timing	217
6-1 Scan Time	218
6-2 Calculating Scan Time	224
6-3 Instruction Execution Times	226
6-4 I/O Response Time	232

SECTION 7

Program Monitoring and Execution	235
7-1 Monitoring Operation and Modifying Data	236
7-2 Program Backup and Restore Operations	252

SECTION 8

Troubleshooting	261
8-1 Alarm Indicators	262
8-2 Programmed Alarms and Error Messages	262
8-3 Reading and Clearing Errors and Messages	262
8-4 Error Messages	263
8-5 Error Flags	266

Appendices

A Standard Models	269
B Programming Instructions	275
C Programming Console Operations	309
D Error and Arithmetic Flag Operation	319
E Data Areas	323
F Word Assignment Recording Sheets	327
G Program Coding Sheet	333
H Data Conversion Table	335
I Extended ASCII	337

Glossary	339
-----------------------	------------
