ToPs 200

Version 2.0

Programming System for
Punching, Nibbling, Forming

Edition: **01/96**

Table of Contents

Chapter 1 ToPs 200: Introduction to the programming system

1. **ToPs under WINDOWS** **1-3**

2. **Concept** **1-4**
   - Basic Idea: Flexibility 1-6
   - Flexible Definition of Machining Operations 1-6
   - Flexible Editing 1-8
   - Flexible Programming Sequence 1-9
   - Parameterizable Postprocessor 1-10
   - Degree of Automation 1-10
   - Machining directions 1-11
   - Making Sample Parts 1-11
   - Preparing for single part processing at the machine 1-12
   - Repositioning 1-13
   - Tooling 1-14

3. **Modular Structure** **1-15**
   - Brief Description of the Modules 1-15

4. **Programming with ToPs** **1-23**
   - Programming Sequence: From the Concept to the Final NC Program 1-23

5. **Files in ToPs** **1-25**

Chapter 2 Using ToPs

1. **Different Computer Platforms, Different Modules - Uniform Handling 2-2**

2. **Starting and Quitting ToPs 2-2**
2.1 Workstation 2-3
2.2 PC 2-6
2.3 Setting the Language Version 2-8

3. **Operating Elements: Mouse and Keyboard 2-9**
3.1 Mouse 2-9
3.2 Keyboard 2-11

4. **User Interface 2-12**
4.1 Central Switchboard: The Initial Screen 2-12
4.2 Screen Layout within the Modules 2-13
4.2.1 Title Area 2-14
4.2.2 Main Menu Bar 2-14
4.2.3 Work Area 2-15
Graphic Display 2-15
Mask Display 2-17

Chapter 3 Basics: Standard Functions

1. **A Continuous Thread: Standard Functions 3-3**

2. **Key Functions 3-4**
2.1 Using F Keys as Hotkeys 3-4
2.2 Repeating Inputs and Functions 3-6

3. **Fixed Screen Menus 3-7**

4. **Graphic Display: Marking Elements 3-10**
4.1 Marking elements 3-10
4.2 Enlarging element display 3-11

5. Mask Display: Basic Functions 3-12
5.1 Data Input 3-12
5.2 Data Selection 3-14
5.3 Switches 3-16
5.4 Function Buttons 3-16

6. Standard Masks 3-17
6.1 Loading and Storing Files: File Selector Masks 3-17
6.2 Acknowledging Messages: Message Box 3-21

Chapter 4 Module DRAWING

1. Creating or Loading Drawings in ToPs 4-3

2. Creating a Single Part Drawing: Overview of Functions 4-4
Functions in the Main Menu Bar 4-4
Screen Menu Functions 4-4

3. Creating a Single Part Drawing: Different Procedures 4-7
Basics 4-7
Basic Rules: Creating Drawings with ToPs 4-8
Creating a New Single Part Drawing 4-9
Loading/Importing, Processing, and Storing an Existing Drawing 4-10

4. Functions in the Main Menu Bar 4-11
4.1 Loading and Importing a Drawing 4-11
Importing Drawings 4-12
4.2 Storing a Drawing 4-13
4.3 Inserting (Drawing) Text in Drawings 4-16

5. Functions in the Screen Menus 4-18
5.1 DRAW 1 and 2: Drawing Geometrical Elements 4-18
5.2 DRAW 2: Measuring 4-33
5.3 DRAW 2: Preparing a Drawing 4-35
5.4 DRAW 2: Single Hole, Row of Holes, Bolt Circle 4-36
5.5 DRAW 3: Creating Construction Geometry 4-42

5.6 DRAW 4: Editing Geometry 4-50
5.7 DRAW 5: Auxiliary Functions 4-59
5.8 HARDCOPY: Printing Drawings 4-66

Chapter 5 Module MINI NEST

1. **What is a Mini Nest?** **5-2**

2. **Creating a Mini Nest: Overview of Functions** **5-3**

3. **Creating Mini Nests: Different Procedures** **5-5**
   Creating a New Mini Nest 5-5
   Loading, Modifying and Storing Existing Mini Nests 5-6

4. **Functions in the Main Menu Bar: Creating, Loading and Storing Mini Nests** **5-7**

5. **Functions in the Screen Menu: Modifying a Mini Nest** **5-9**

Chapter 6 Module SHEET

1. **The Nesting Processor: Function** **6-3**

2. **Sheet Layout: Overview of Functions** **6-5**

3. **Sheet Layout: Procedure** **6-7**
   Generating a Sheet 6-7
   Displaying the Nesting Result 6-7
   Editing the Nesting Result Manually 6-8

4. **Functions in the Main Menu Bar** **6-9**
4.1 Creating a Nesting Job 6-9
4.2 Nesting Start 6-19
4.3 Manual Nesting 6-31
4.4 Outputting the Nesting Results 6-33
4.5 Loading the Machine Drawing 6-36
Editing the machine drawing 6-37

5. **Functions in the Screen Menus** **6-38**
5.1 NESTING 1: Information - Deleting and Adding parts 6-38
5.2 NESTING 2: Editing Parts 6-42
5.3 NESTING 3: Displaying the Machine Environment, Measuring 6-44

Chapter 7 Module TECHNOLOGY

1. **Flexible Definition of Machining, NC Program Generation** **7-4**
Machining Strategies 7-5

2. **Overview of Functions** **7-8**

3. **Programming Procedures** **7-11**

4. **Graphic Display: Significance of Colours and Symbols** **7-15**

5. **Selecting a Machine** **7-16**
Basic Machines and Machine Types 7-16
Selecting the Machine: Procedure 7-19
Choosing Other Machines 7-21

6. **Loading and Saving files** **7-22**
Loading Files 7-23
Saving Files 7-24

7. **Tools** **7-25**
Overview: Which Tool for Which Machining Operation? 7-25
7.1 Activating Tools 7-26
7.2 Tool Selection Window 7-28

7.3 Displaying the Tools Used 7-30
7.4 Tool Lists 7-32
7.5 Tool Data Management 7-36

8. Definition of Machining 7-37
8.1 Menus PROCESSING 1 and PROCESSING 1-2 7-41
AUTOCUT: Automatic processing definition 7-42
Creating Machining Operations in the Menu PROCESSING 1 7-50
Overlapping 7-53
Parts/Scrap Removal 7-55
Tooling 7-64
Creating Machining Operations in the Menu PROCESSING 1-2 7-65
Cutting Scrap to Pieces 7-67
Deleting Machining Operations 7-70
8.2 Menu PROCESSING 2 7-71
Modifying Machining Operations 7-71
Compulsory Sequences 7-73
8.3 Menu PROCESSING 3 7-77
8.4 Menu PROCESSING 4 7-78
Switching Functions 7-78
Thread Forming and Engraving 7-85
Setting Punching Mode Data 7-87
Repositioning 7-88
8.5 Menu PROCESSING 5 7-92
Simulation of Machining Operations 7-94
8.6 Transferring Single-Part Machining to the Sheet 7-96

9. Sheet Layout 7-98
Sheet Layout in the TECHNOLOGY Module 7-98
Defining Sheet Data 7-100
9.1 Menu SHEET NESTING 1: Multiple-Copy Machining, Delete Functions 7-101
Multiple-Copy Machining 7-102
Sheet Layout: Delete Functions 7-108
9.2 Menu SHEET NESTING 2: Modifying the Position of a Part 7-109
9.3 Menu SHEET NESTING 3: Construction Geometry, Measuring 7-110
9.4 Menu SHEET NESTING 4: Clamp Position, Sheet Size, Loading Position 7-111
9.5 Menu SHEET NESTING 5: Hardcopy, Presettings ... 7-113

10. Sheet optimization 7-114
Overview of functions 7-114
10.1 Automatic sheet optimization 7-115
10.2 Interactive sheet optimization 7-121

11. Generating NC Programs and Checking Them 7-125
11.1 Flexible sheet layout at the machine 7-128
Programming in ToPs 200 7-129
Operation at the machine 7-137
11.2 Checking the NC Program 7-144
11.3 Displaying and Printing the Set-Up Plan 7-145
11.4 Displaying and Printing the NC Program 7-147

Chapter 8 Module DATA

1. Data Base Administration 8-2

2. Machine Data Entry 8-4
Modifying, Copying, Deleting, Creating Machines 8-5
2.1 Changing the Machine Configuration 8-7
2.2 Modifying Machine Data 8-10

3. Material Data Entry 8-35

4. Rules 8-37

5. NC Output 8-38
5.1 Modifying Machining Times 8-38
5.2 Support Functions 8-41

6. Tool Data Entry 8-42
6.1 Tool Administration 8-43
Tool data entry 8-44
Modifying Tool Data, Deleting Tools 8-55
Changing / Deleting Tool Types 8-58
6.2 Creating Tool Drawings 8-59

Chapter 9 Module SYSTEM

1. **System Management (Overview)** 9-2

2. **Functions in the SYSTEM Module** 9-3
   - Overview of Functions 9-3
   - Directory Management 9-4
   - Displaying Files 9-5
   - Data Transfer 9-6
   - Displaying a Message List 9-8

Chapter 10 Automation Components

1. **Automation Components in ToPs 200** 10-3

2. **Defining the Machine Configuration** 10-3

3. **TRUMALIFT SheetMaster** 10-6

3.1 Module TECHNOLOGY: Defining Removal of Parts and Scrap with the TRUMALIFT SheetMaster 10-7
   - Procedure 10-7
   - Removal with the TRUMALIFT SheetMaster 10-9
   - Overview of Removal Functions 10-12
   - Menu PARTS/SCRAP REMOVAL LIFT 10-13
   - Menu UNLOADING AREA 10-22

3.2 Module DATA 10-31
   - Entering Data for the TRUMALIFT SheetMaster 10-32
   - Machine Configuration 10-33
   - Modifying Machine Data 10-35

4. **TRUMAGRIP** 10-47
   - Programming the TRUMAGRIP 500 10-47
   - Modifying TRUMAGRIP Data 10-48

5. **TRUMASORT** 10-52

5.1 TRUMASORT R4/S 10-52

5.2 TRUMASORT L 10-54

6. **Basic Data in ToPs 200 - Overview 10-59**
Data Sheets 10-59
Data Sheet for TRUMALIFT SheetMaster 1250: Loading 10-60
Data Sheet for TRUMALIFT SheetMaster 1250: Unloading 10-61
Data Sheet for TRUMALIFT SheetMaster 1300: Loading and Unloading 10-62
Data Sheet for TRUMALIFT SheetMaster 1600: Loading and Unloading 10-64
Input Forms 10-66
Lift parameters in ToPs 200 10-75

Chapter 11 Additional Functions (Options)

1. **Option: Importing Drawings**
IGES Interpreter
DXF Interpreter
MI Interpreter
GRA Interpreter 11-3
1.1 Importing 11-3
Procedure 11-4
1.2 Generating DXF Files 11-9
1.3 Automatic Module for Converting CAD Files 11-10
The 'convert.exe' Program 11-10
Procedure 11-11
Examples 11-13
Background Information: Options for the Command 'convert.exe' 11-14

2. **Option: Free shape nesting processor 11-16**
2.1 The nesting processors in comparison 11-16
2.2 Free shape nesting of parts 11-17
Choosing the nesting strategy 11-18
Nesting remainder sheets 11-19
Saving and loading the nesting job as a file 11-20
