Programming Manual

TruPunch 5000, TruPunch 3000, TruPunch 1000

TRUMPF

Programming manual

TruPunch 5000, TruPunch 3000, TruPunch 1000

Edition **2006-10**

Table Of Contents

Chapter 1 Master File / NC Programming

1. Program structure (master file) 1-3

2. Characteristic file 1-4
2.1 Table block 1-4
Number of characteristic description blocks 1-4
Characteristic description blocks: 1-4
Number of characteristic data blocks 1-6
Characteristic data block 1-6
Characteristic file syntax 1-7

3. NC code 1-30
3.1 Language elements of the programming language 1-31
3.2 Block number (N address) 1-33
3.3 Selective block suppression 1-34
3.4 Programming messages 1-34
3.5 Comments 1-35

4. Subroutine technique 1-36
4.1 Subroutine structure 1-36
4.2 Calling up subroutines 1-37
4.3 Repeating a subroutine 1-39
4.4 Nesting a subroutine 1-40

Chapter 2 Overview of all NC Functions

1. G-functions 2-2

2. M functions 2-3

3. Cycles for punching 2-4

4. Tool cycles 2-5

5. Sheet handling cycles 2-6

Chapter 3 Path Information / Feed

1. Path information 3-2

1.1 X word 3-2

1.2 Y word 3-2

1.3 C word 3-3

2. Feed 3-5

2.1 F word 3-5

Chapter 4 G Functions / Path Conditions

1. Linear interpolation 4-3
1.1 G00 4-3
1.2 G01 4-4

2. Circular interpolation 4-6
2.1 G02 4-6
2.2 G03 4-6
2.3 I and J, interpolation parameters 4-7
2.4 CR, radius programming 4-7

3. Programmable dwell time, G04 4-12

4. Acceleration programming, TC_POS_ACCEL 4-13
4.1 Acceleration tables for TruPunch 5000 4-14
Acceleration table (Y=1300) with RTC cartridges 4-14
Acceleration table (Y=1300) with metal cartridges 4-15
Acceleration table (Y=1600) with RTC cartridges 4-16
Acceleration table (Y=1600) with metal cartridges 4-16
4.2 Acceleration table for TruPunch 3000 4-17
4.3 Acceleration table for TruPunch 1000 4-18

5. Programmable zero point offset 4-19
5.1 TRANS 4-19
5.2 ATRANS 4-20

6. Units of measurement 4-23
6.1 G70 4-23
6.2 G71 4-24

7. Absolute/relative dimensions 4-26
7.1 G90 4-26
7.2 G91 4-26
7.3 AC data 4-27
7.4 IC data 4-28

8. Dimensions for rotational axes 4-30
8.1 DC data 4-30
8.2 ACP data 4-32
8.3 ACN data 4-33

Chapter 5 M Functions

1. Programmed stop 5-2
1.1 M00 5-2
1.2 M01 5-3

2. Program end 5-4
2.1 M02 5-4
2.2 M30 5-4
2.3 M17 5-5

Chapter 6 Punching Cycles

1. Synchronizing C axes 6-3
1.1 TRAILON 6-3
1.2 TRAILOF 6-4

2. Punching 6-5
2.1 PUNCH_ON 6-5
2.2 PUNCH_OFF 6-8

3. Nibbling 6-9
3.1 NIBBLE_ON 6-9
3.2 NIBBLE_OFF 6-9

4. Path subdivision 6-10
4.1 SPP 6-10
4.2 SPN 6-10

5. Punching with delay 6-14
5.1 PDELAY_ON 6-14
5.2 PDELAY_OFF 6-14

6. Presser foot punching 6-16
6.1 PRESSERFOOT_ON 6-16
6.2 PRESSERFOOT_OFF 6-16

7. Softpunch (optional) 6-18
7.1 TC_SOFTPUNCH_ON 6-18
7.2 TC_SOFTPUNCH_OFF 6-19

8. Chip vacuum system 6-20
8.1 TC_SUCTION_ON 6-20
8.2 TC_SUCTION_OFF 6-20

9. Tapping (option) 6-22
9.1 TC_TAP_ON 6-22
9.2 TC_TAP_OFF 6-24

10. Marking (optional) 6-26
10.1 TC_MARK_ON 6-26
10.2 TC_MARK_OFF 6-27

11. Slotting (optional) 6-29
11.1 TC_DEEP_PUNCH 6-29

12. Quick beading (optional) 6-31
12.1 TC_BEAD_ON 6-31
12.2 TC_BEAD_OFF 6-32

13. TRUMPF Multibend (optional) 6-34
13.1 TC_BEND_ON 6-34
13.2 TC_BEND_OFF 6-36

14. TRUMPF Multishear (optional) 6-37
14.1 TC_MULTISHEAR_ON 6-37
14.2 TC_MULTISHEAR_OFF 6-39

15. TRUMPF roller tools (optional) 6-41
15.1 TC_WHEEL_ON 6-41
15.2 TC_WHEEL_OFF 6-43

16. TRUMPF calibration tool (optional) 6-45
16.1 TC_SHEET_CALIB 6-45

Chapter 7 Tool Cycles

1. Tool lubrication 7-2
1.1 TC_TOOL_LUBE_ON 7-2
1.2 TC_TOOL_LUBE_OFF 7-3

2. Die spray lubrication (optional) 7-4
2.1 TC_SHEET_LUBE_ON 7-4
2.2 TC_SHEET_LUBE_OFF 7-5

3. Tangential application 7-6
3.1 TC_TANGTOOL_ON 7-6
3.2 TC_TANGOOL_OFF 7-7

4. Tool technology 7-8
4.1 TC_CLAMP_CYC 7-8
4.2 TC_TOOL_TECH 7-8
4.3 TC_TOOL_POSITION 7-12

5. Tool change 7-15
5.1 TC_TOOL_NO 7-15
5.2 TC_TOOL_CHANGE 7-15

Chapter 8 Sheet Handling Cycles

Definition 8-3

1. Sheet technology 8-4
1.1 TC_SHEET_TECH 8-4

2. Loading a sheet 8-6
2.1 TC_SHEET_LOAD 8-6
2.2 TC_PREPARE_SHEET_LOAD (TruPunch 5000, TruPunch 3000) 8-10

3. Unloading a sheet 8-12
3.1 TC_SHEET_UNLOAD 8-12
3.2 TC_PREPARE_SHEET_UNLOAD (TruPunch 5000, TruPunch 3000) 8-20

4. Workpiece removal 8-21
4.1 TC_PART_UNLOAD (TruPunch 5000, TruPunch 3000) 8-21
4.2 TC_PART_UNLOAD (TruPunch 1000) 8-27
4.3 TC_PREPARE_PART_UNLOAD (TruPunch 5000, TruPunch 3000) 8-31

5. Repositioning 8-33
5.1 TC_SHEET_REPOSIT 8-33

Chapter 9 Jump Programming

Definition 9-2

1. **LABEL (jump destination) 9-3**

2. **GOTOF (jump instruction) 9-4**

3. **GOTOB jump instruction 9-5**
