- 10HP, 230/460V 60Hz spindle motor
- Safe pneumatic clamping fence
- 62" table travel length standard cuts rails to 59", panels to 55"

FM-44 Series

Entry level single-edge machine features a heavy base, precision feed chain, a choice of tenoner or roller hold down, and a variety of stations: scoring, shaping, wheel, or belt sanding and edge foiling.

FM-45 Series

The only high-production edge machine designed and built in the USA. A heavier, more robust version of the FM-44, accommodates veneers, PVC, laminates, and solid wood bands.

FM-200 Series

Double-end, can combine sizing, scoring, shaping and sanding with foiling. Executes the same operations on two sides of a part simultaneously.

FM-240 Series

Trims and copes parts from 4 3/4" through 36" long. Integrated automatic hopper-feed is standard. Can reach production speeds of 65 parts per minute.
