

Section 3

Receiving and Storing the Screen

3.1 GENERAL INFORMATION

There are three sizes of the 120° DSM Screen: 2 ft., 4 ft., and 6 ft. wide made up of one, two, or three 2 ft. screen and nozzle components. See **figure 3-1**. The basic components of the 120° DSM Screen are: screen box, screen surface, adjustable feed nozzle, and control system.

Standard procedure is to ship the unit completely assembled with all interior alignment made.
