

GE Jenbacher JGS416 60 Hz OEM General Arrangement Drawing

OEM model-family outline drawing showing the engine-generator package arrangement, major connections and reference dimensions.

Confirmed equipment relationship

- The two available packages are confirmed as GE Jenbacher JGS 416 GS-S.L generator sets.
- The installed J 416 GS-B91 engine and 60 Hz arrangement are supported by nameplates and factory records.
- Use the drawing for general reference only; final package/building shipping dimensions require loadout engineering.

Source and use

Source is a GE Jenbacher standard 60 Hz JGS416 OEM general-arrangement drawing supplied in the project technical file. Original document properties were replaced with controlled ARC Power Systems web metadata.

Model-family reference only. It does not replace the installed package drawings, field measurements or engineered transport plan.
