BURNABY MILL DIVISION

ANNOUNCEMENT

#5 M/C NEW PRESS SECTION

The existing 3rd Press Section on #5 M/C will soon be removed and replaced with a more efficient press for water removal from the sheet.

The new press is a Long Nip Press (LNP) and will allow an increase in loading capability from 780 to 2000 pli using 56" diameter rubber covered rolls. The press will have both top and bottom felts to carry the removed water from the nip. The purpose of this press is to improve the strength of the board produced as well as to increase the machine capacity.

The press builders, Tampella, are a large Finnish paper machinery manufacturer with LNP installations all over the world. There are currently two very successful installations in Canada on linerboard machines at Domtar Red Rock and Eurocan Kitimat.

The technology we have bought is proven and is state of the art. The press rebuild will cost close to \$3,000,000, is planned to take 5 days to install and will consolidate our leadership in the manufacture of linerboard and corrugating medium, from secondary fibre, on this machine.
