

Headlight / proCam XS combination improves operative site visibility and video capture

proCam XS
4K MicroCamera

proCam XS 4K MicroCamera

World-leading camera to improve your everyday communication and documentation

proCam XS Headlight Camera - first miniature 4k camera. Features a SONY IMX 415 sensor that captures both 4k video and high resolution still photos from proCam XS / headlight combination. The proCam XS's powerful sensor allows deep, clear magnification. It's easy to capture stable, super high quality video and images any time with no interruptions to the procedure.

All advantages in one camera. Futudent non-interruptive cameras cover most of the demands of documentation: full HD videos and high quality stills (up to 8MP). Cloud services make it fast and secure to share videos and images to colleagues and clients. Multiple mounting options are available for the proCam XS 4K Camera: can be mounted on headlights, Loupes, overhead lights, gooseneck lights.

Key Features

- 4k Video Quality
