Brief technical information:

- Chinese Model: I7-FIM
- Fabric Width: 1.8 - 4.0 meters
- Speed: 0 - 40 m/min
- Weight: 800 kgs (For model ST-FIM-180)
- Electric Specs: 3 Phase 380V 50Hz (Standard)
- Dimensions(L*W*H): 2500 x 3500 x 2750mm (for model ST-FIM-180 only)

Detailed Description

I7-FIM **Fabric Checking Machine** with optional data collection and analysis system (4-point system) to handle a wide range of fabrics. This machine can be supplied to operate from plait/loose fabrics to plait/loose fabrics, or with various other fabric inlet and outlet options.

1). End of Fabric Roll Automatic Stop Sensor - for Next Roll Joining

This will allow for continuous fabric inspection, from one piece of roll to next.

2). Full Width Fabric Inspection - with 30 Degree Fixed Angle Inspection Screen

Fabric can be checked under the aid of different viewing and lighting options.

3). Accurate Fabric Length

Fabric roll length can be taken by industrial standard measuring systems with digital readouts to give consistent fabric roll assessments.

4). Versatile Fabric Input and Output Options - Synchronize with Other Production Operations

Optional systems are available for different fabric input and output presentations, roll to roll, continuous fabric input, etc.

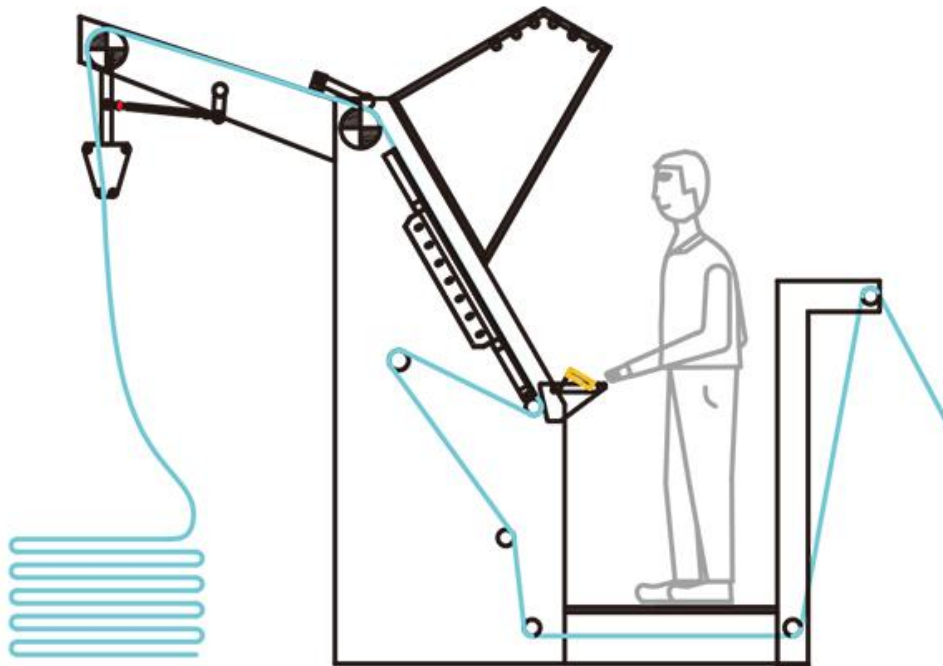

5). Data Collection and Analysis System (4-point System) - Optional

100% fabric inspection with software for accurate fabric roll analysis and printout

Warranty: 1 year (Extension is available)

Additional information:

Status: Made to order
Condition: Complete and in excellent condition (Including 1 year warranty)
Location: United Kingdom
Delivery: 2 Months from receipt of order
