

# F.L. SMITHE AEM

## CHAMPION HAND FEED STRING AND BUTTON MACHINE

The Hand Feed String and Button Machine AEM is a hand-fed machine for affixing string and button fasteners to envelopes, as well as containers and other articles. It automatically attaches string, seal flaps, buttons and reinforcement patch, and cuts the string to any desired length up to 14" as rapidly as an operator can feed envelopes into the machine. It also attaches the body buttons without string in a separate operation. The addition of a special attachment will make it possible to cut the string in lengths up to 22". The buttons, string and reinforcement patch are fed directly to the eyeleting mechanism, and all are affixed at one stroke of the machine.
