

Flexi-Mover [1100kg]

The Flexi-Mover is an electrically operated trolley for transporting materials up to 1100 kg. This trolley can operate on slopes of up to 6° and has a powerful electric motor with magnetic brake for optimum control when transporting loads.

The Flexi-Mover trolley benefits from large foam filled tyres making it possible to drive and operate on rough terrain and move around obstacles on site. The electric-hydraulic raise and lower system ensures stable and convenient operation at all times.

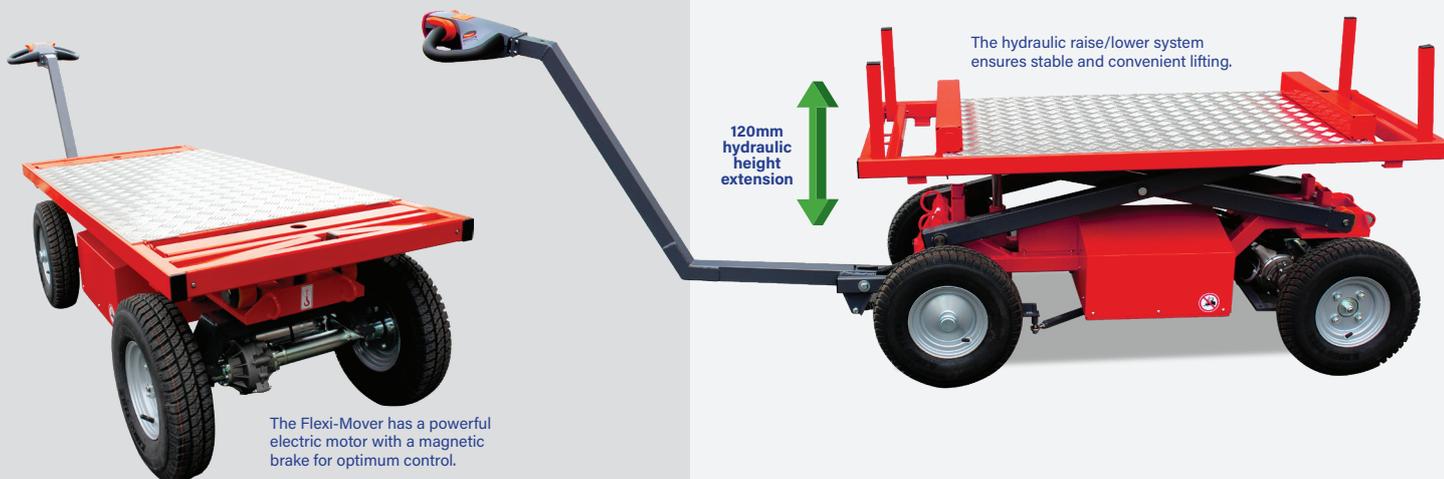

This electronic trolley can drive backwards and forwards with all functionality being controlled from the ergonomic control lever with built-in emergency stop. Its folding supports also make it easy to remove the goods with a forklift on site.

Key Features

- Maximum safe working load 1100kg
- 6° maximum slope incline
- Folding supports for removing goods with a forklift
- Magnetic brakes for optimum control
- Hydraulically raise and lower the bed with the onboard controls

Reference Code

AGT109

The Flexi-Mover has a powerful electric motor with a magnetic brake for optimum control.

Technical Specifications

Max capacity	1100kg
Gradeability	6°
Speed	3-6 Km/h
Battery	24v
Battery charger	110V
Battery recharge time	6 hours
Weight	300kg

The Flexi-Mover features folding supports that make it easier to remove goods with a forklift.

Drive backwards and forwards and the raise/lower function is controlled from the ergonomic control lever with built-in emergency stop.
