

Technical Specification Sheet

Turbo Levator M120 ^[VSL75]

New. The powerful vacuum system of the Turbo Levator M120 makes it a must-have machine for lifting porous stone such as concrete, sandstone and asphalt weighing up to 120kg.

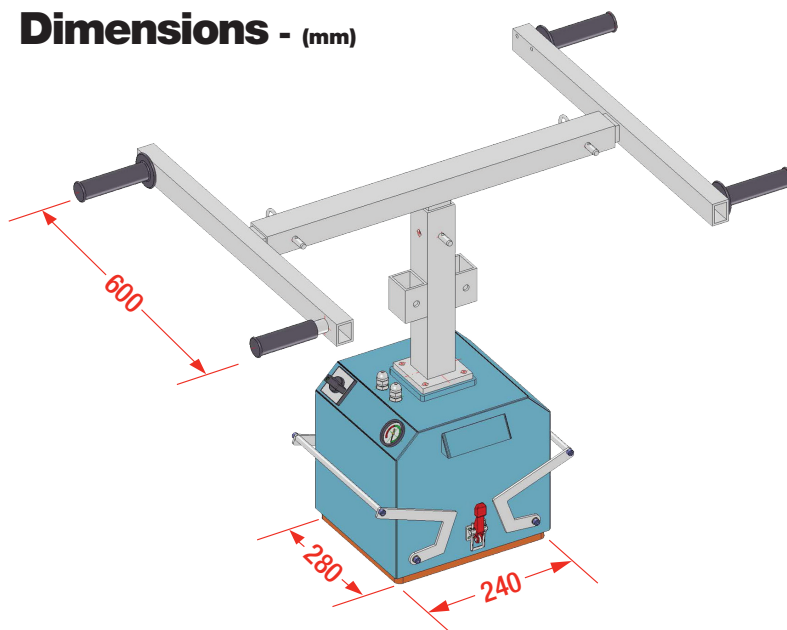

Manufactured from light-weight metal, this vacuum lifter is designed for manual lifting by two people and features a height adjustable handle.

The Turbo Levator is a quick, safe and convenient solution to lifting porous and rough stone from the top of each slab, thus avoiding damage to the outer edges of the stone.

Features

- 50kg capacity (standard) or 120kg (large suction plate)
- Dimensions of suction plates: 280x240mm (standard) and 310 x 600mm (120kg)
- Width of handles: 600mm
- Constant running single circuit vacuum
- Visual low vacuum alert
- Weight of lifter 13kg
- Mains powered 230v-50Hz

Dimensions - (mm)
